Welcome to Wyndos

Wyndos runs a window-cleaning round from one place. It holds your customers and the areas they belong to, plans which day each area is cleaned, and gives you and your team a simple list to work through on the phone. It also records who has paid and sends the reminder texts.

Who this guide is for

If you are...	Start here
The owner setting Wyndos up for the first time	Quick start
The owner or office, day to day	Getting around , then the chapters you need
A worker on the round	Worker guide . It stands on its own, so you can send just that chapter to new starters
Anyone stuck	FAQ and troubleshooting

How the screenshots work

Most screenshots have **red numbered boxes**. Each number is explained in the list under the picture.

- Pictures with a dark menu down the left side are from a **computer**.
- Tall narrow pictures are from a **phone**.

The screens are the same on both. The phone just stacks things vertically and puts the menu along the bottom.

Tip: Boxes like this one hold tips and warnings.

Five words worth knowing

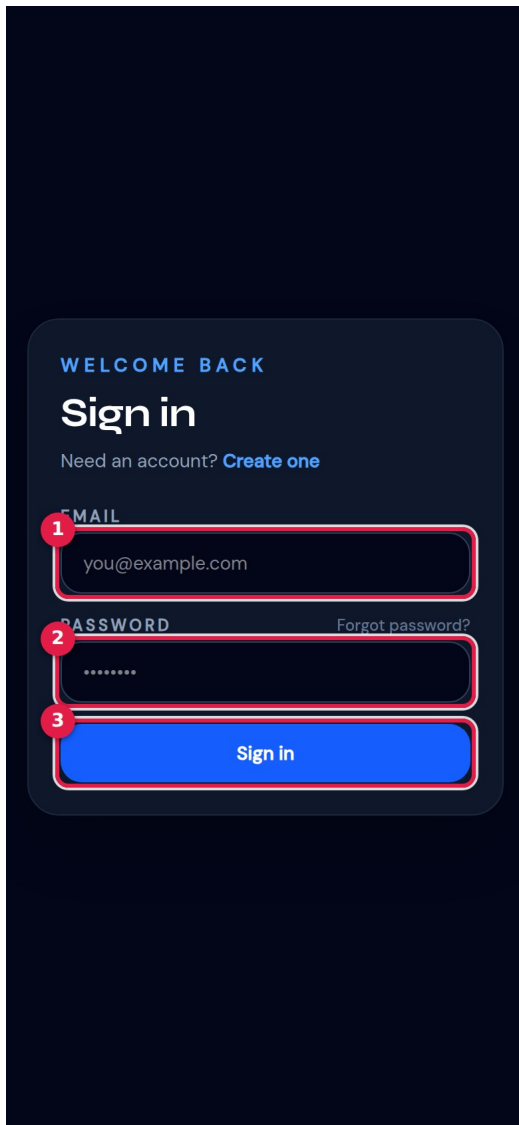

- **Area:** a group of customers you clean together, such as a village or an estate. Each area has its own **frequency**, for example every 4 weeks. A customer's frequency always comes from their area.
- **Day:** one area booked on one date. A date can have several days on it, such as Cuckney and Edwinstowe both on Tuesday.
- **Job:** one customer's clean on a day.
- **Done / Done & Paid:** how a job is ticked off. Use Done when they'll pay later and Done & Paid when they paid at the door.
- **Carry over:** jobs you didn't get to move on to another date when you finish the day.

Quick start

This gets a new business from an empty account to a first worked day in about half an hour. Each step links to the full instructions.

1. Sign in

Go to **wyndos.io** and sign in with your email and password.

Sign-in screen on a phone

1. Your email address.
2. Your password. If you've forgotten it, use **Forgot password?**.
3. **Sign in**.

Tip: On a phone, add Wyndos to your home screen. It then opens like an app and keeps working when the signal drops. See [Install on your phone](#).

2. Fill in your business details

Open **Settings** → **Business**. Enter your business name, phone number and address, and put your **bank / payment details** in the box near the bottom. These details appear on invoices and in the “windows cleaned, here’s how to pay” text. Press **Save Changes**.

See [Settings](#) → [Business](#).

3. Create your areas

Open **Areas** and press **+ Add Area** for each village or estate you clean. For each one, set:

- **how often** it’s cleaned (every 4 weeks, for example)
- **when it’s next due**

Every customer in an area follows that area’s frequency. If some customers need a different frequency, give them their own area, for example “Cuckney (8 weekly)”.

See [Areas and frequency](#).

4. Add your customers

You can add customers in either of two ways:

- **Import a spreadsheet.** Go to **Customers** → **Import** and upload your existing list (Excel or CSV). This is best if you have more than a handful. See [Importing customers](#).
- **Add them one by one.** Go to **Customers** → **+ Add Customer**. See [Adding a customer](#).

After importing, open **Customers** → **Tidy addresses** and check that the house, street and town were split correctly. The street order on your day sheets depends on it.

5. Put the areas in the diary

Open the **Scheduler** on a computer and drag each area onto the day you’ll clean it. After that, Wyndos books each area’s next visit for you whenever you complete a day.

See [Planning with the Scheduler](#).

6. Invite your team (optional)

In **Settings** → **Team**, type a worker’s email, choose **Worker**, **Senior worker** or **Office / admin**, and press **Send invite**. They set their own password. You decide exactly what each person can see.

See [Team and permissions](#).

7. Choose how texts are sent

In **Settings** → **Messaging**, choose how texts go out:

- **From my phone (free)**: each text opens in your phone's Messages app ready to send.
- **Automatic (VoodooSMS)**: texts are sent for you.

While you're getting started, leave **Test mode** on. Texts are then only written to the log and nothing reaches customers.

See [Texts](#).

8. Work your first day

On your phone, open **Schedule** and tap **Work today as one list**.

1. Press **Start day**.
2. Tick each house off with **Done** or **Done & Paid** as you go.
3. When you're finished, press **Complete Day**. Anything you didn't get to is carried over.

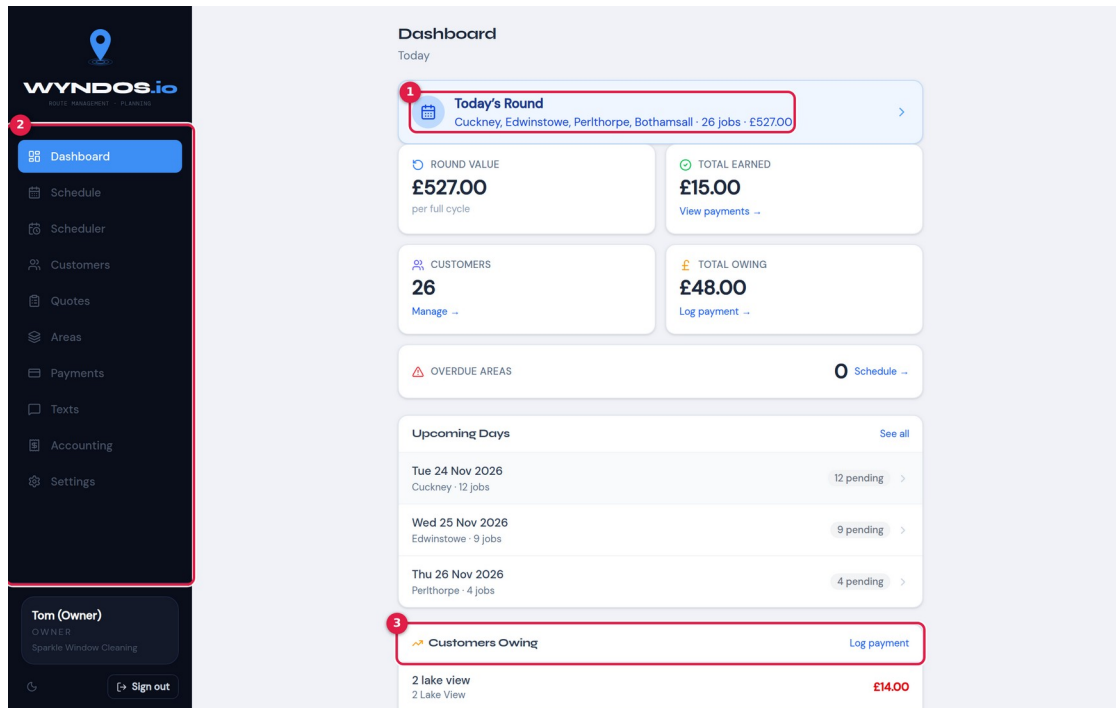

See [Working a day](#).

That's it. From now on, completing an area books its next visit automatically. Your daily routine is: open today, work the list, complete the day.

Getting around

On a computer

The menu runs down the left-hand side. You only see the items your permissions allow. The owner sees all of them.

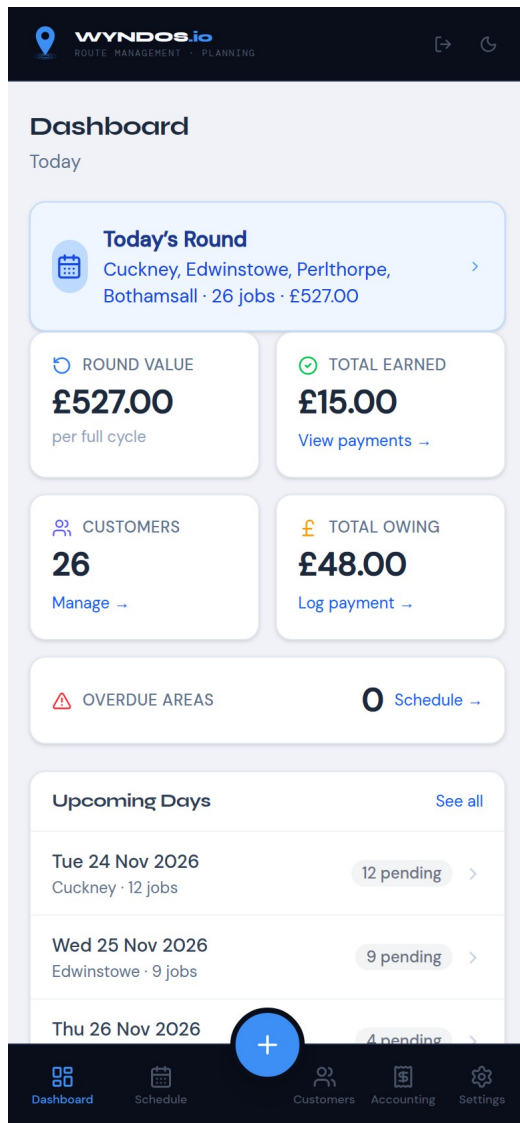

Dashboard on a computer

1. **Today's Round:** the areas booked for today, with job count and value. Click it to open today's work.
2. **The menu:**
 - **Dashboard:** today at a glance.
 - **Schedule:** your list of days.
 - **Scheduler:** the planning diary. This is on computers only.
 - **Customers, Quotes, Areas and Payments.**
 - **Texts:** reminders and bulk messages.
 - **Accounting:** income, expenses and tax year.
 - **Settings.**
3. **Customers Owing:** who owes you money, with a shortcut to log a payment.

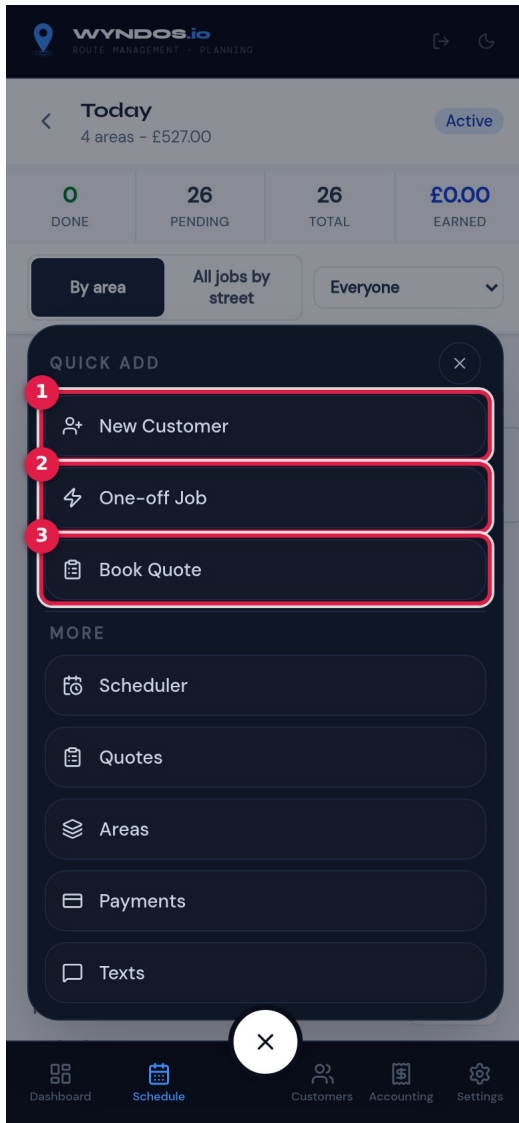

The dashboard also shows the round value, what's been earned, how many customers you have, the total owed, any **overdue areas**, and the next few booked days.

On a phone

On a phone the menu moves to a bar along the bottom. The round + button in the middle opens **Quick add**.

Dashboard on a phone

Quick add menu

1. **New Customer:** add a customer.
2. **One-off Job:** book a single clean for a new or existing customer on any date.
3. **Book Quote:** book a visit to price up a new customer.

Under **More** are the pages that don't fit on the bottom bar: Scheduler, Quotes, Areas, Payments, Texts and so on.

Install Wyndos on your phone

Wyndos works in the phone's web browser, but it's better installed on the home screen:

- **iPhone (Safari):** tap the **Share** button, then **Add to Home Screen**.
- **Android (Chrome):** tap the **⋮** menu, then **Install app** or **Add to Home screen**. Wyndos may also offer "Add Wyndos to home screen" itself.

Once installed, Wyndos opens full-screen and **keeps working with no signal**. If you tick jobs off offline, they're saved on the phone and sent as soon as signal returns. If something couldn't be saved, you'll see a warning: "Some offline changes couldn't be saved".

Light and dark mode

The moon or sun button at the top (on a phone) or bottom-left (on a computer) switches between light and dark mode.

Signing out

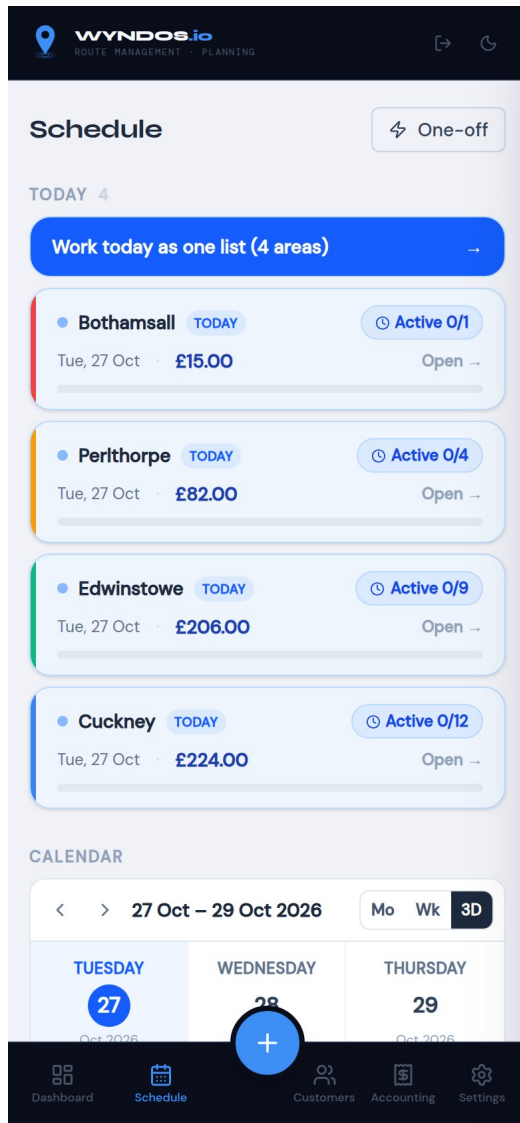

Use the **Sign out** button: at the bottom-left on a computer, or the arrow icon at the top on a phone.

Working a day

This is the screen you'll use most. It's designed for a phone in one hand, but it works just as well on a computer.

Open the day

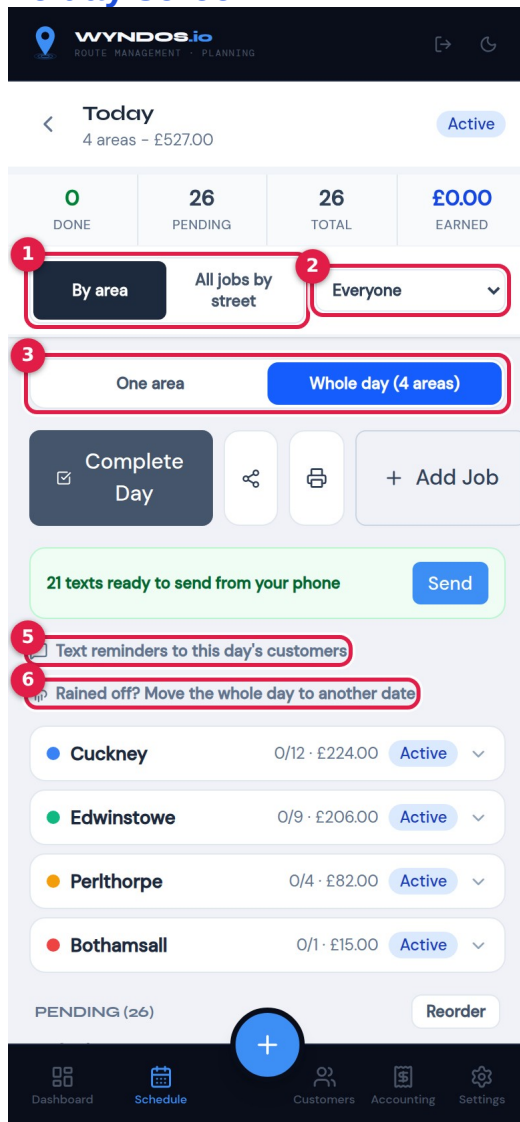

Tap **Schedule** on the bottom bar. Today's areas are listed at the top.

Schedule list

- Tap **Work today as one list** to see every area booked today in one list. This is usually what you want.
- Tap a single area (for example **Cuckney** → **Open**) to see only that area.
- Use **One-off** to book a single extra job.

The day screen

Whole day, grouped by area

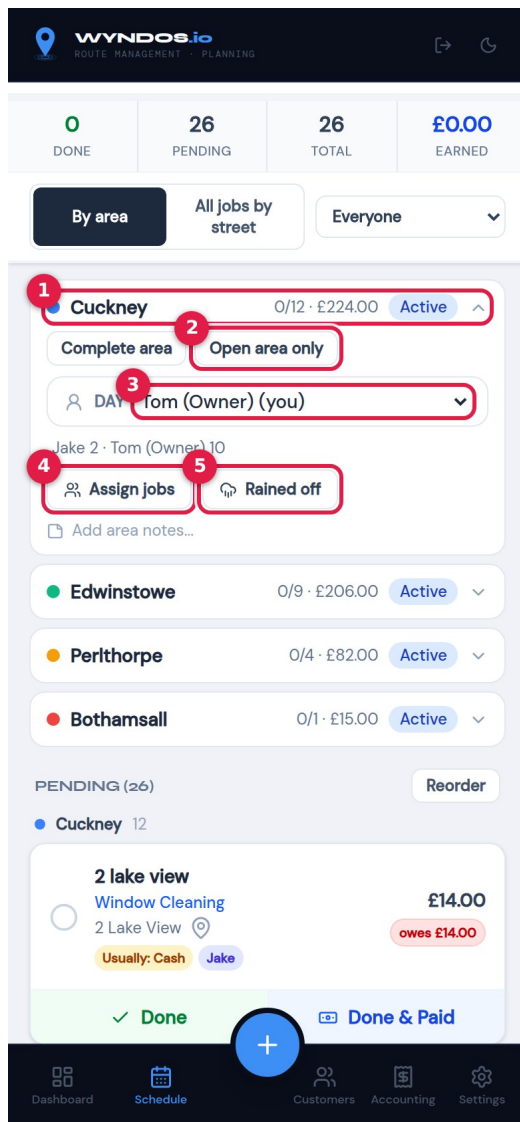

The four boxes at the top show jobs **Done**, **Pending**, **Total** and money **Earned** so far. Below them:

1. **By area / All jobs by street**: how the list is arranged.
 - **By area** keeps each area together, in your saved route order.
 - **All jobs by street** mixes every area into one list, sorted by town, then street, then house number. This is handy when areas overlap.
2. **Show jobs for**: filter to one person's jobs, or show **Everyone**.
3. **One area / Whole day**: switch between the single area and every area booked on this date.
4. **Start day**: marks the day as under way. It then changes to **Complete Day**. Next to it are:

- **Share:** sends the day as a PDF.
 - **Print:** opens the run sheet.
 - **Add Job:** adds a one-off job to the day.
5. **Text reminders:** text everyone on this day. See [Texts](#).
 6. **Rained off?:** move the whole day to another date. See [Rained off](#).

Area cards

Each area booked today has a card showing jobs done out of total, value and status. Tap a card to open it.

An opened area card

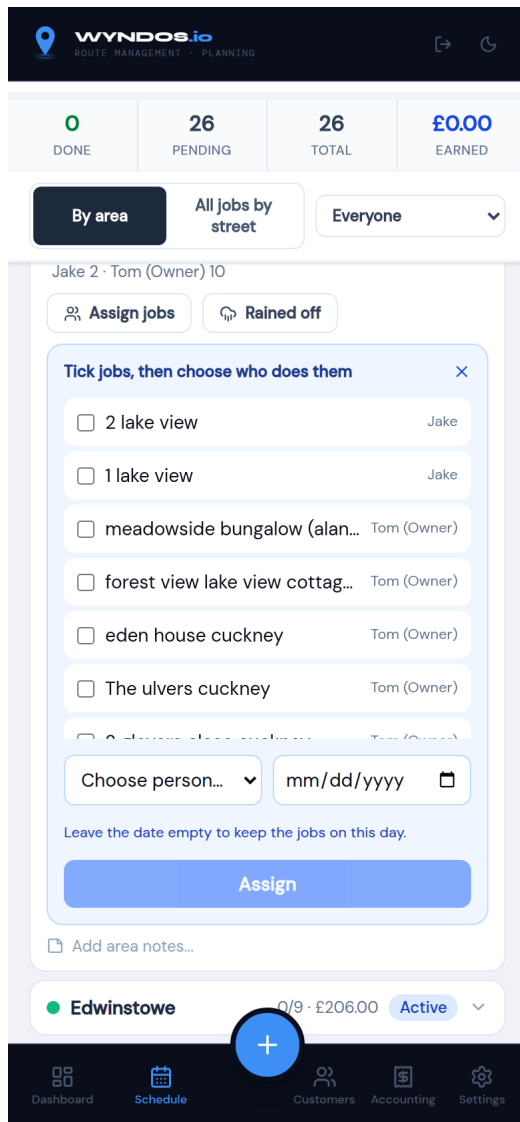

1. The area. Tap it again to close the card.
2. **Open area only:** jump to just this area's page.

3. **Who is doing this day:** give the whole area to one person. The line underneath shows how the jobs are split, for example “Jake 2 · Tom 10”.
4. **Assign jobs:** split the area's jobs between people (see below).
5. **Rained off:** move just this area to another date.

Under those buttons you can add **area notes**, such as “park by the church”, which everyone working the area will see.

Split jobs between workers

Tap **Assign jobs**. Tick the jobs you want to hand out, then choose who does them. Each job shows who has it now.

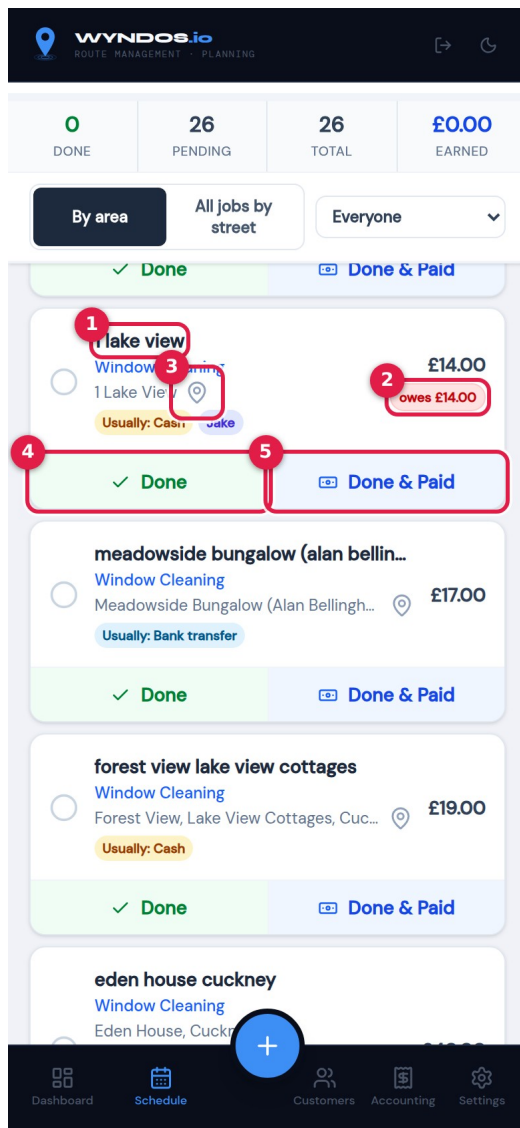

Assign jobs panel

Workers only see the jobs given to them. Use **Show jobs for** at the top to check one person's list.

Ticking off jobs

Every job has a card:

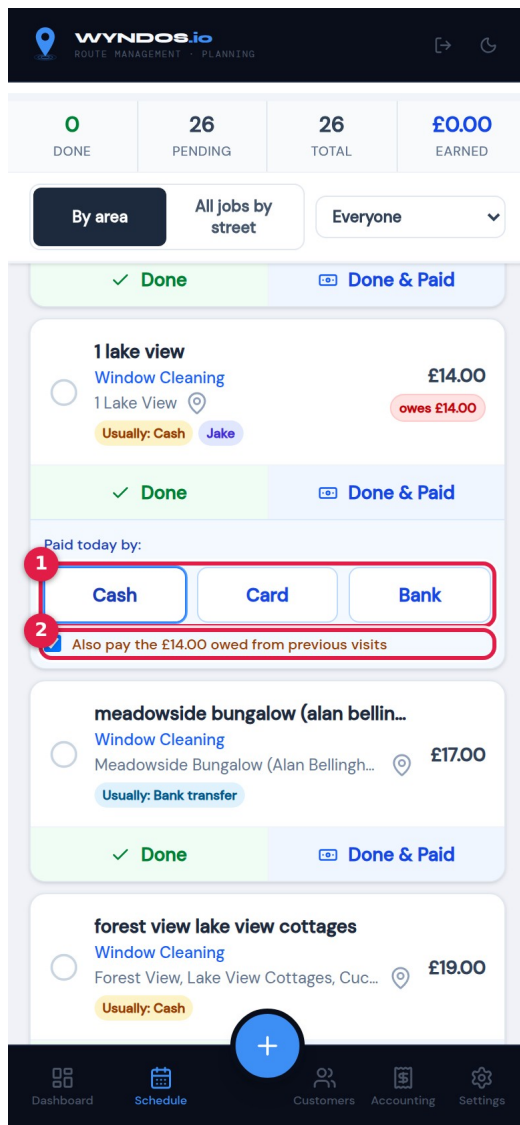

A job card

1. The customer, their job type and address. Tap the name to open the job's options (see below).
2. **Owes £...:** they have unpaid cleans from before. The coloured tags show how they **usually pay** (Cash, Bank transfer and so on) and who the job is assigned to.
3. **Map pin:** opens the address in Google Maps.
4. **Done:** the job is finished but not paid. It's added to what they owe.
5. **Done & Paid:** the job is finished and paid at the door.

Done & Paid

When you tap **Done & Paid**, choose how they paid:

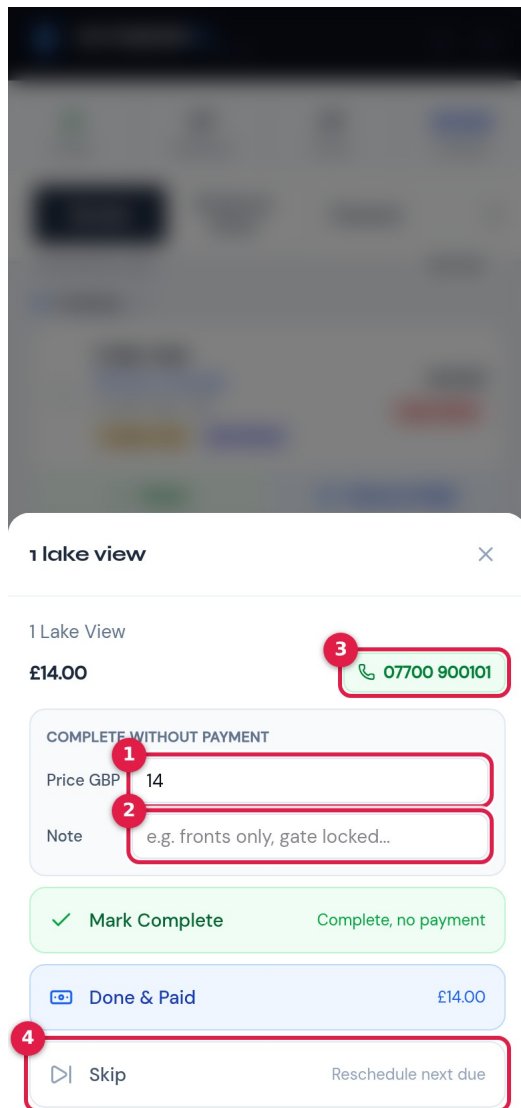

Paid today by

1. **Cash, Card or Bank.**
2. If they owed money from earlier visits, this box is ticked to settle that too. Untick it if they're only paying for today.

Changing the price, adding a note, or skipping

Tap the customer's name to open the job's options:

Job options

1. **Price:** change today's price, for example if you only did the fronts. This changes today's visit only.
2. **Note:** for example "gate locked, fronts only".
3. **Phone:** tap to ring the customer.
4. **Skip:** not cleaned this time. The job moves to their next normal visit.

Mark Complete is the same as **Done**, and **Done & Paid** works the same as on the card.

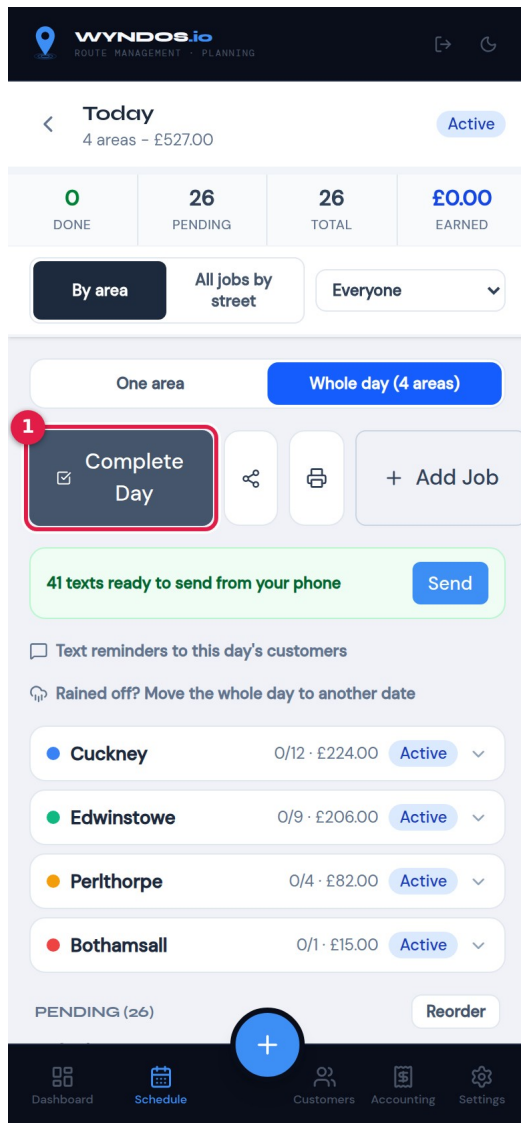

Made a mistake? Tap a finished job to open it again and use **Undo**.

Changing the order

In **By area** view, tap **Reorder** above the pending list, then drag jobs into your route order. Tap **Done reordering** when finished. The order is remembered for next time.

Completing the day

When you're finished, press **Complete Day**. To finish just one area while the others carry on, open its card and press **Complete area**.

Complete Day

If any jobs are left, Wyndos asks what to do with them:

Complete Day ×

1 26 jobs still unfinished. Ticked jobs carry over to the day below. Untick any you want to skip this time (they wait for their next normal visit).

26 selected Select all Clear

2 lake view
☒ Window Cleaning · Cuckney
 2 Lake View · £14.00

1 lake view
☒ Window Cleaning · Cuckney
 1 Lake View · £14.00

Move 26 jobs to...

2 **New overdue day** 3 **Alongside an area**

Date for the overdue batch
 10/28/2026 📅

Creates a temporary "Overdue – area" group on this date for each area.

4 **Carry over 26 & complete** Cancel

Carry over unfinished jobs

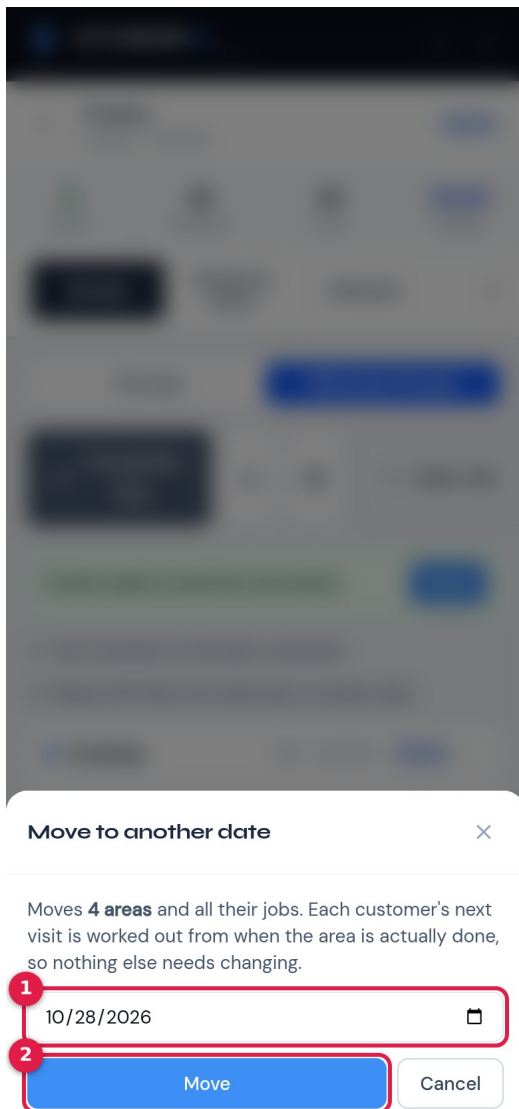

1. How many jobs are unfinished. Ticked jobs are carried over. Untick any you want to skip until their next normal visit.
2. **New overdue day**: puts the carried-over jobs in a temporary "Overdue" group on the date you choose.
3. **Alongside an area**: adds them to another area's booked day.
4. **Carry over & complete**: finishes the day.

When an area is completed, Wyndos:

- books the area's **next visit** using its frequency, counted from the day it was actually done
- sends (or queues) the **"windows cleaned, here's how to pay"** text, if you've switched it on. See [Automatic texts](#).

Rained off: move the day

Tap **Rained off? Move the whole day to another date**. You can also use **Rained off** on a single area card.

Move to another date

1. Pick the new date.
2. Press **Move**.

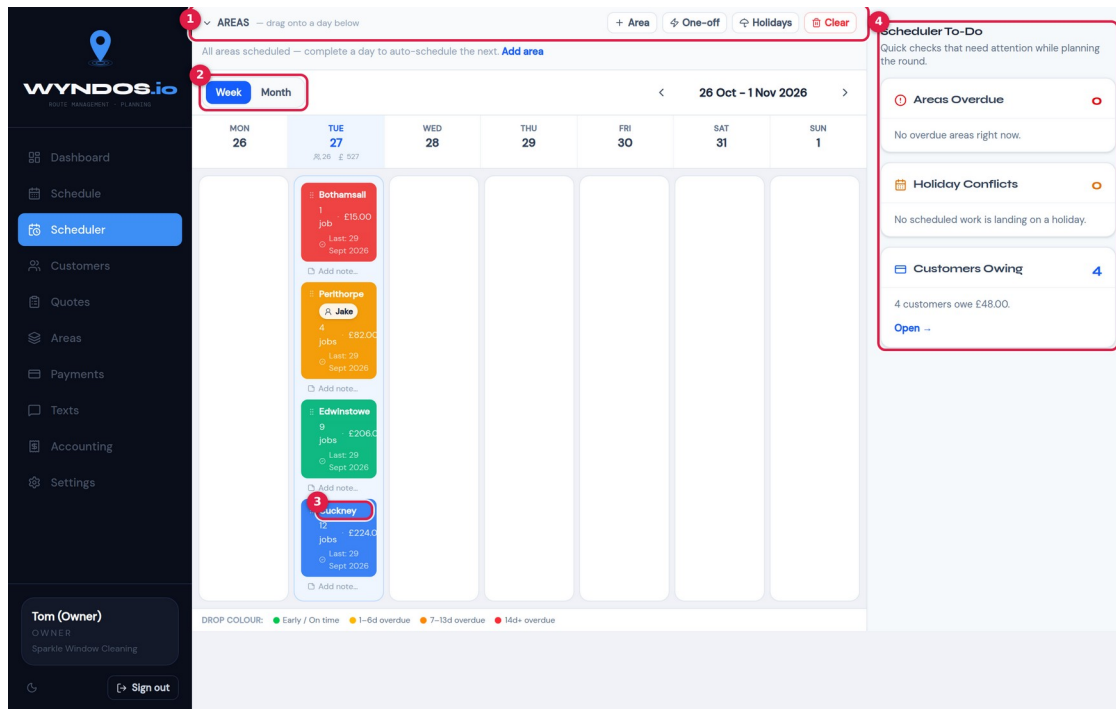

Everything moves together. Each customer's next visit is still worked out from when the area is actually done, so nothing else needs changing.

Texts waiting on your phone

If you send texts **from your phone**, a green bar shows how many are still waiting, for example “41 texts ready to send from your phone”. Tap **Send** to carry on where you left off.

Planning with the Scheduler

The Scheduler is the diary where you decide which area is cleaned on which day. It's built for a computer or tablet, so it doesn't appear on the phone's bottom bar. It needs the **Plan the diary** permission.

Scheduler, week view

1. **Areas:** every area, with a colour showing how due it is. Drag an area onto a day to book it. The buttons along this bar:
 - **+ Area:** create a new area.
 - **One-off:** book a single job.
 - **Holidays:** block out days you're away. Booked work that lands on a holiday is flagged.
 - **Clear:** removes all future booked days. You'll be asked to confirm first.
2. **Week / Month:** change the view. Use the arrows to move between weeks or months.
3. **A booked day:** one area on one date, with its job count and value. Drag it to another date to move it, or click it to open the day (see below).
4. **Scheduler To-Do:** quick checks while you plan:
 - **Areas overdue:** press **Open** to jump to the area.
 - **Holiday conflicts.**
 - **Customers owing.**

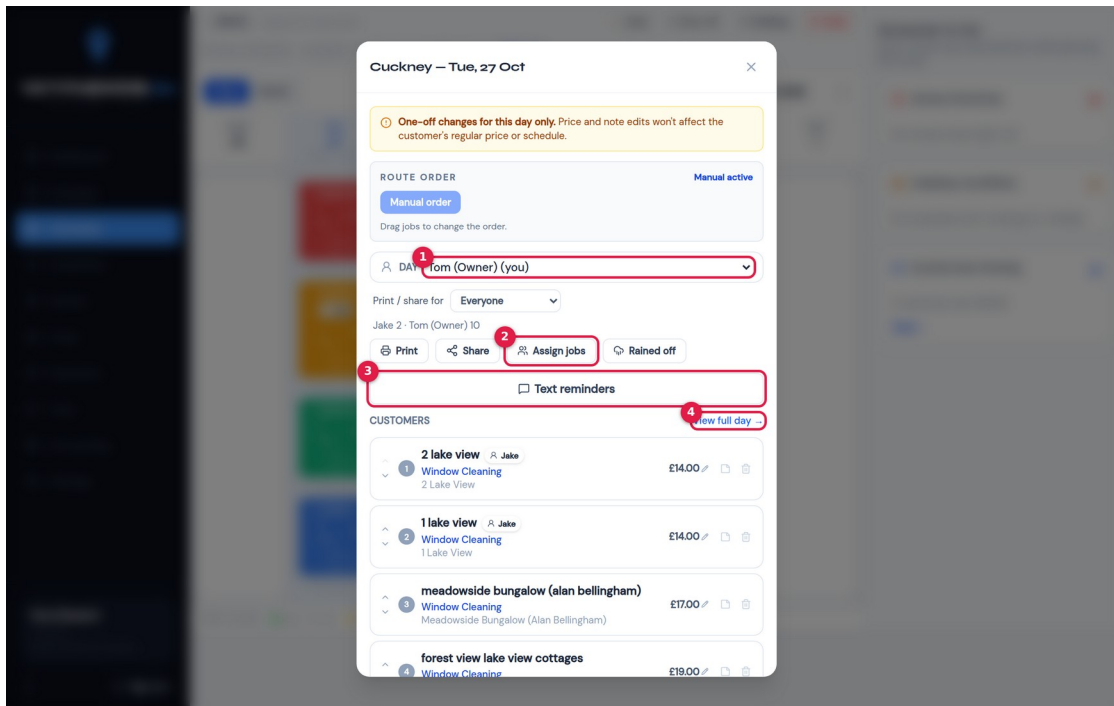

The key at the bottom explains the colours: early/on time, 1–6 days overdue, 7–13 days overdue, and 14 or more days overdue.

How booking works

- Drag an area onto a date to book its customers who are due.
- After you complete an area, its **next visit is booked automatically** using the area's frequency, counted from the day it was actually done. You mostly use the Scheduler to check and adjust, not to book everything by hand.
- To move a booked day, drag it to another date. You can also use **Rained off** on the day itself (see [Working a day](#)).

The day pop-up

Click a booked day to manage it without leaving the diary.

Day pop-up in the Scheduler

1. **Who is doing this day:** give the whole day to one person.
2. **Assign jobs:** split the jobs between people. **Print / share for** chooses whose jobs go on the printout or PDF.
3. **Text reminders:** text everyone on this day. See [Day reminders](#).
4. **View full day:** open the full day screen.

The pop-up also lets you:

- change a price or note for **this day only**, without changing the customer's regular price
- drag jobs into your route order
- mark jobs paid

Tip: On a phone, use **Schedule** instead. You can do the same assigning and texting from the day screen itself.

Areas and frequency

An **area** is a group of customers cleaned together, usually a village, an estate or a group of streets. Areas are the heart of Wyndos: you book areas, not individual customers.

Area	Frequency	Next Due	Customers	Value	Actions
Cuckney	Every 4 weeks	27 Oct 26	12	£224.00	[Edit] [Delete]
Edwinstowe	Every 4 weeks	27 Oct 26	9	£206.00	[Edit] [Delete]
Perithorpe	Every 4 weeks	27 Oct 26	4	£82.00	[Edit] [Delete]
Bothamsall	Every 4 weeks	27 Oct 26	1	£15.00	[Edit] [Delete]

Areas page

Each row shows:

- the area's colour
- how often it's cleaned
- when it's **next due**
- how many customers it has
- the value of one round

The icons on the right edit or delete the area.

Add or edit an area

Press **+ Add Area**, or the pencil icon next to an existing area. Then set:

- **Area name**, for example "Cuckney".
- **Schedule type**. There are two kinds:
 - **Every N weeks**: set **Repeat every**, for example 4 weeks.
 - **Monthly (fixed day)**: pick a **day of the month**. Use 1–28 to avoid problems at the end of short months.
- **Next due date**: when this area should next be cleaned.

Frequency belongs to the area

Every customer in an area is cleaned at the area's frequency. If you change an area from 4 weekly to 6 weekly, all its customers change with it.

If a few customers in the same village need a different frequency, make them **their own area**. For example:

- **Cuckney:** every 4 weeks
- **Cuckney (8 weekly):** every 8 weeks

The import does this for you. A row whose frequency differs from its area goes into an area named "area (N weekly)".

Moving customers between areas

Choose whichever way suits you:

- **On the Areas page:** open **Assign Customers**, choose a **Target Area**, then drag customers across or use the **Move** button.
- **On a customer's page:** press **Change Area**.
- **For many at once:** use **Customers** → **Bulk Edit** and change the **Area** column.

Route order within an area

The order of houses on a day comes from the area's route order. To change it:

- **On the day screen:** drag jobs using **Reorder** (see [Working a day](#)).
- **In the Scheduler:** drag jobs in the day pop-up.

Customers list

The boxes at the top count visible customers, **overdue** customers (past their due date), **inactive** customers (hidden from scheduling) and the **outstanding debt**.

1. **Import**: bring in customers from a spreadsheet.
2. **Bulk Edit**: change many customers at once in a table.
3. **Tidy addresses**: check how addresses were split into house, street and town.
4. **+ Add Customer**: add one customer.

Use the search box to find someone by name or address. **Filters** narrows the list and **Show inactive** includes paused customers.

Each row shows the customer's area, when they're next due, their frequency, price and what they owe. The switch on the right makes a customer **active** or **inactive**. Inactive customers are kept on file but never booked.

Add a customer

Press **+ Add Customer**. On a phone, use **+ → New Customer**.

The screenshot shows a mobile app interface for adding a customer. The form is titled 'Add Customer' and contains several fields. Red boxes with numbers 1 through 4 highlight specific sections: 1. 'House no. / name *' field containing '14'. 2. 'Shows as:' field containing '14 Church Street, Edwinstowe, NG21 9QA'. 3. 'Area *' dropdown menu showing 'Edwinstowe' and 'Price (£) *' spinner set to '16'. 4. 'Usually pays by' dropdown menu showing '- Not set -'. Other visible fields include 'Name *' (Mrs Jones), 'Street' (Church Street), 'Town / village' (Edwinstowe), 'Postcode' (NG21 9QA), 'Phone' (e.g. 07700 900000), 'Email' (email@example.com), 'Schedule: every 4 weeks · next run 27 Oct', 'Job Type / Name' (Window Cleaning), 'Advance notice required' toggle, and 'Notes' (Any special instructions...).

Add Customer form

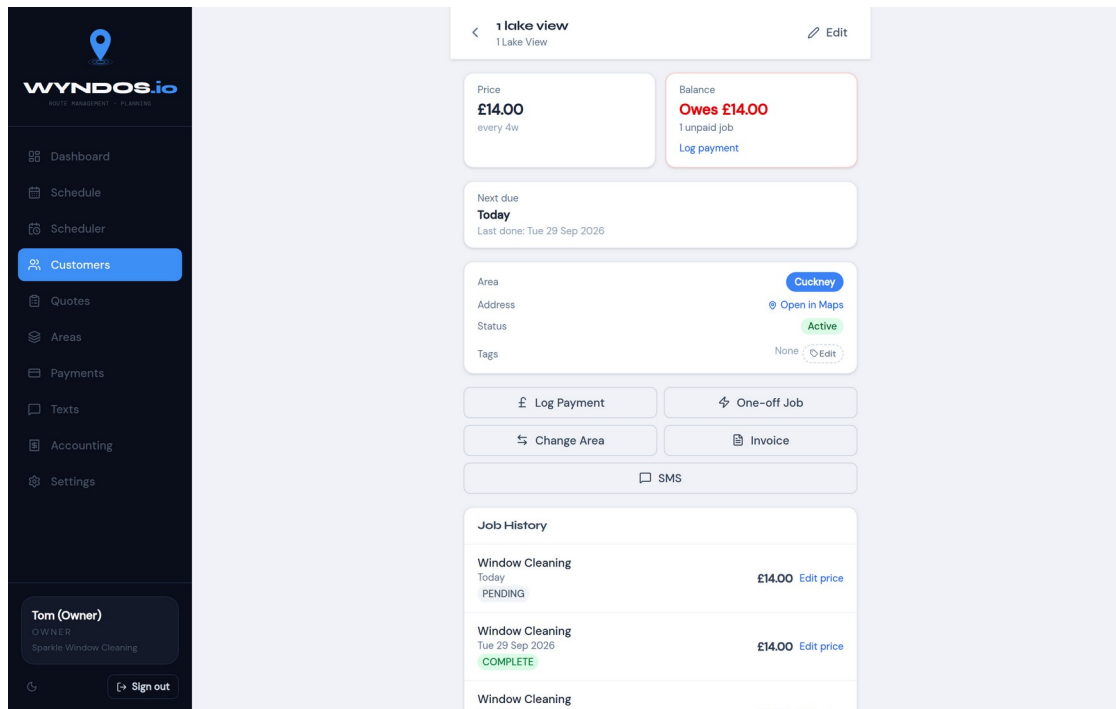

1. **House no. / name** and **Street**, then **Town / village** and **Postcode**. Keep these separate: the day sheet sorts houses by street and house number.
2. **Shows as:** a preview of the full address that customers and workers will see.
3. **Area** and **Price**. The line underneath confirms the frequency, which comes from the area, and the next run, for example “Schedule every 4 weeks · next run 27 Oct”.
4. **Usually pays by:** Cash, Bank transfer, Card and so on. This shows as a tag on the job card.

The rest of the form:

- **Phone:** a UK mobile, if you want to text them.
- **Email.**
- **Job type:** for example “Window Cleaning”.
- **Advance notice:** tick this if they want warning before you come.
- **Notes:** shown on the job card, such as “watch overhead cables”.

The customer page

Click any customer to open their page.

Customer page

At the top are their price and **balance**. A red balance means they owe money. Below that are their next due date, area, address (with **Open in Maps**), status and tags.

The buttons:

- **Log Payment:** record money received.
- **One-off Job:** book an extra clean on any date.
- **Change Area:** move them to another area. Their frequency changes to the new area's.
- **Invoice:** produce a PDF invoice.
- **SMS:** text this one customer.

Job History lists every visit, with its date, price and status: pending, complete, skipped or moved. You can correct a past price with **Edit price**.

Edit a customer

Press **Edit** at the top of their page.

Edit Customer

☐ Paid by another customer

Edit Customer

1. The address parts, the same as when adding.
2. **Clean every** is shown but can't be changed here, because it's set by the area. To change it, change the area's frequency or move the customer to an area with the frequency you want.

You can also set:

- **Leave a slip**: leave a note or slip after cleaning.
- **Paid by another customer**: for example a landlord who pays for several houses.
- **Active customer**: untick to pause them.
- GoCardless details, if you use it.

Tidy addresses

Older or imported addresses are often one long line. **Customers** → **Tidy addresses** splits them into house, street and town, and lets you check the guesses.

 - phone, email
 - usually pays, slip, advance notice

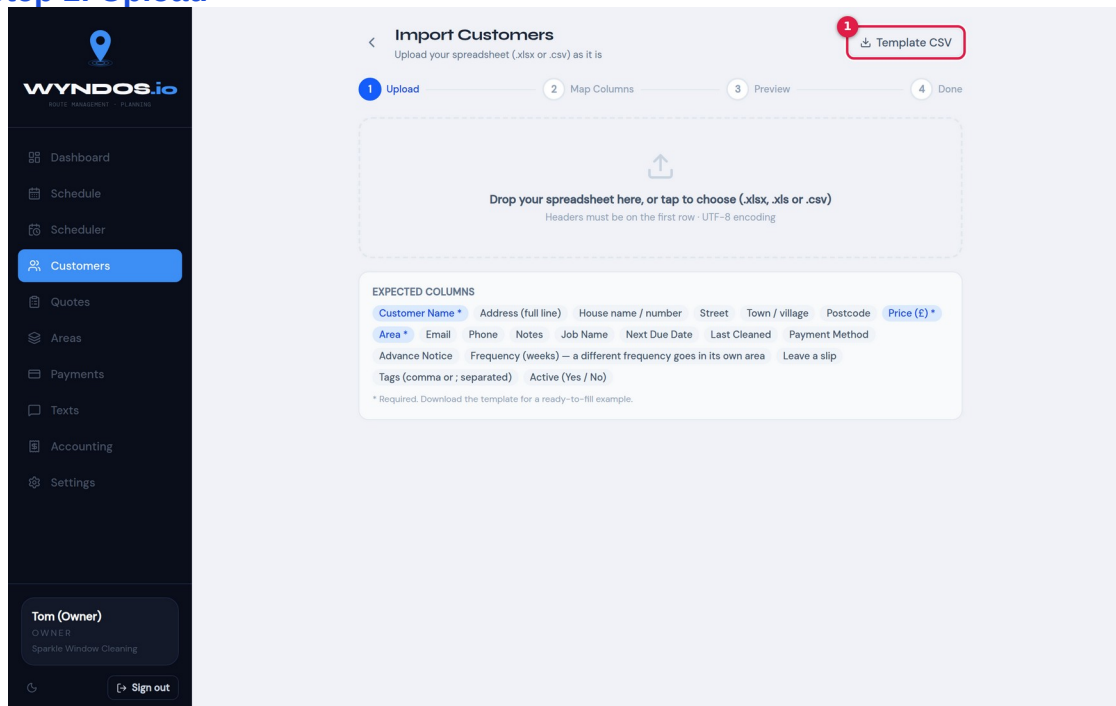

Changed cells are highlighted. Filter by area or search at the top.

- Save changes** saves every edit in one go. The counter next to it shows how many rows you've changed.

Import customers from a spreadsheet

Customers → **Import** takes an Excel (.xlsx, .xls) or .csv file. The column headings must be on the first row.

Step 1: Upload

Import step 1

1. **Template CSV** downloads a ready-made spreadsheet with every column Wyndos understands. Starting from it is the easiest way.

The columns Wyndos recognises:

Column	Notes
Customer Name	Required
Area	Required. New areas can be created automatically
Price (£)	Required
Address (full line)	Or use the separate parts below
House name / number, Street, Town / village, Postcode	Better than a full line
Phone, Email, Notes, Job Name	
Next Due Date, Last Cleaned	Dates
Payment Method, Advance Notice, Leave a slip	Yes/No or text
Frequency (weeks)	A different frequency for the same area puts the customer in its own area
Tags	Separate with commas or semicolons
Active	Yes / No

A file exported from **Settings** → **Data** → **Customers** imports straight back in.

Step 2: Map the columns

Import Customers
Upload your spreadsheet (.xlsx or .csv) as it is

Upload Map Columns Preview Done

26 customers detected · 21 columns. Map each field below.

IMPORT OPTIONS

- ☐ **Create new areas automatically**
If a row's area name doesn't match any existing area, a new area will be created with default settings. You can adjust it afterwards in Areas.
- ☐ **Update existing customers**
If a customer already exists with the same name (or name + address), their details will be overwritten. Otherwise a new record is created.
- ☐ **Start fresh — delete all existing customers first**
All existing customers (and their job & payment history) will be permanently deleted before the import runs.
- ☐ **Import job history (optional second CSV)**
Upload a separate CSV of past cleans. Each row creates a completed job and optional payment record.

Customer Name **Required** **Column** **Concat** **Fixed** **Skip**

Name

First row preview: "2 Lake View"

Address (full line) **Column** **Concat** **Fixed** **Skip**

Address

First row preview: "2 Lake View"

House name / number **Column** **Concat** **Fixed** **Skip**

House no./name

Import step 2

- For each Wyndos field, choose which column of your file it comes from. You can also:
 - Concat**: join several columns together.
 - Fixed**: use the same value for every row.
 - Skip**: leave it out.

A preview of the first row is shown under each field.

Import options at the top:

- Create new areas automatically**: area names that don't exist yet are created.
- Update existing customers**: customers with the same name, or the same name and address, are updated instead of added twice.
- Start fresh**: deletes all existing customers first.

Warning: Start fresh can't be undone.

- Import job history**: a second optional CSV of past cleans.

Step 3: Preview and import

16	49 first ave ed...	49 First Ave, Edwinst...	£17	Edwinstowe	—	07700 900114	OK

Import step 3

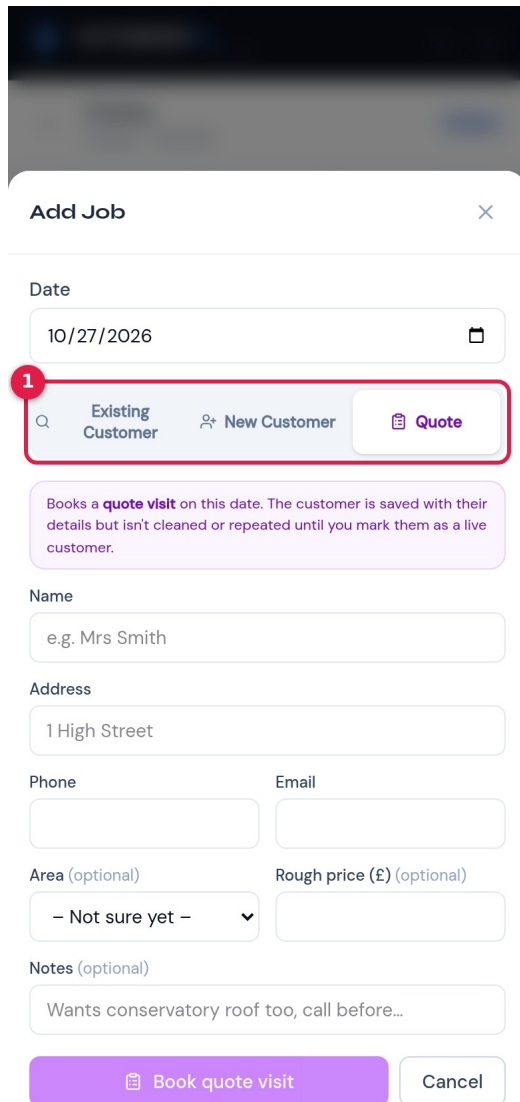

Every row is checked before anything is saved. The **Issues** column flags problems such as a missing price or “not a mobile” (that number can't be texted). Fix them in your file, or go **Back to mapping**. When it says **ready**, run the import.

Quotes and one-off jobs

Book a quote visit

When someone asks for a price, book a **quote visit**. It appears on that day's list like any other job, so whoever is nearby can call in and price it up.

On a phone, tap **+** → **Book Quote**. On a computer, use **Quotes** → **+ Book quote**.

Add Job ✕

Date
10/27/2026

1 Existing Customer New Customer **Quote**

Books a **quote visit** on this date. The customer is saved with their details but isn't cleaned or repeated until you mark them as a live customer.

Name
e.g. Mrs Smith

Address
1 High Street

Phone Email

Area (optional) Rough price (£) (optional)
– Not sure yet –

Notes (optional)
Wants conservatory roof too, call before...

Book quote visit Cancel

Book a quote visit

1. Choose what you're booking:
 - **Existing Customer**: an extra job for someone already on your books.
 - **New Customer**: a one-off job for someone new.
 - **Quote**: a visit to price up a new customer. This is the purple option in the picture.

For a quote, fill in:

- the **date** of the visit
- their **name, address, phone** and **email**
- the **area**, if you know it
- a **rough price**, if you have one
- any **notes**

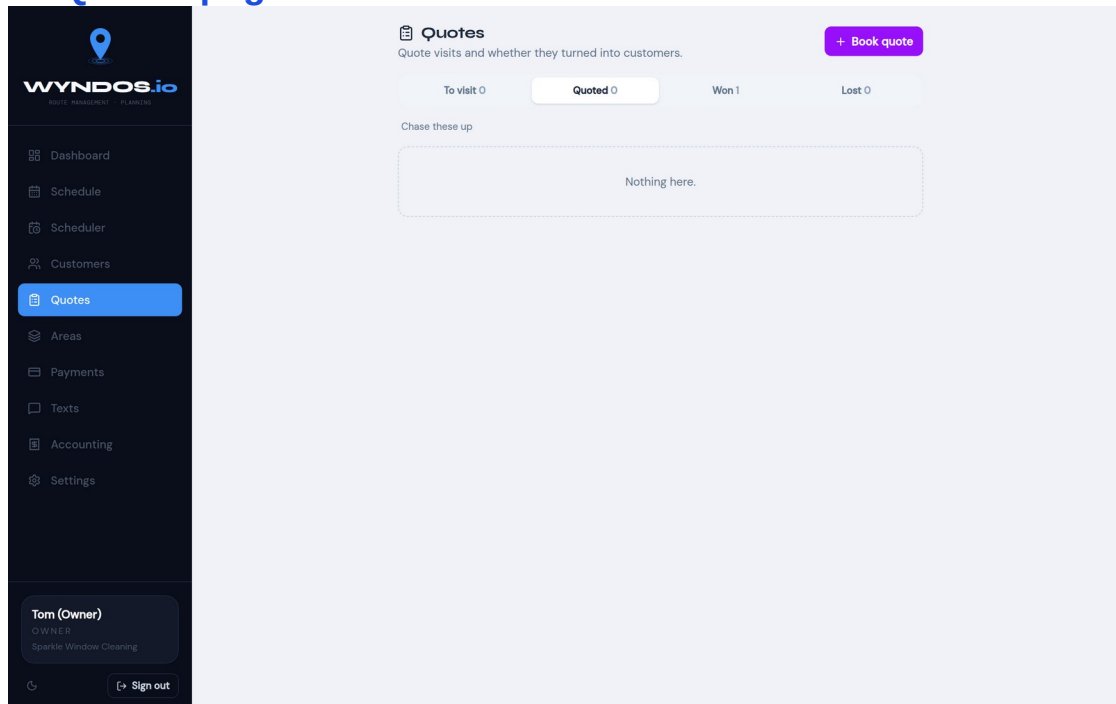

Press **Book quote visit**. The person is saved with their details, but they won't be cleaned or repeated until you mark them as a live customer.

On the day: mark quoted, won or lost

A quote visit shows on the day list with purple buttons:

1. **Mark quoted**: enter the **price quoted** and **how often**, plus a note such as "wants a callback Friday". Press **Save quote**.
2. **Mark live customer**: they said yes. Choose their **area**, confirm the price and how they'll usually pay, and press **Make live customer**. They join that area's runs from now on.
3. **Lost**: they said no. The quote is kept for your records.

The Quotes page

Quotes page

The Quotes page follows every quote through four tabs:

- **To visit**: quote visits booked but not done yet.

- **Quoted:** priced, waiting for an answer. These are the ones to chase.
- **Won:** turned into live customers.
- **Lost.**

One-off jobs

A **one-off job** is a single clean that doesn't repeat, such as a gutter clear, a conservatory roof or an end-of-tenancy clean. Book one from:

- **+ → One-off Job** on a phone
- **One-off** on the Schedule page or in the Scheduler
- **One-off Job** on a customer's page
- **Add Job** on the day screen

You can book it for an existing customer or a new one. It appears on the chosen date like any other job.

Workers with the "Their days" permission can book quotes and one-off jobs too. The job goes on their own day.

Payments and accounting

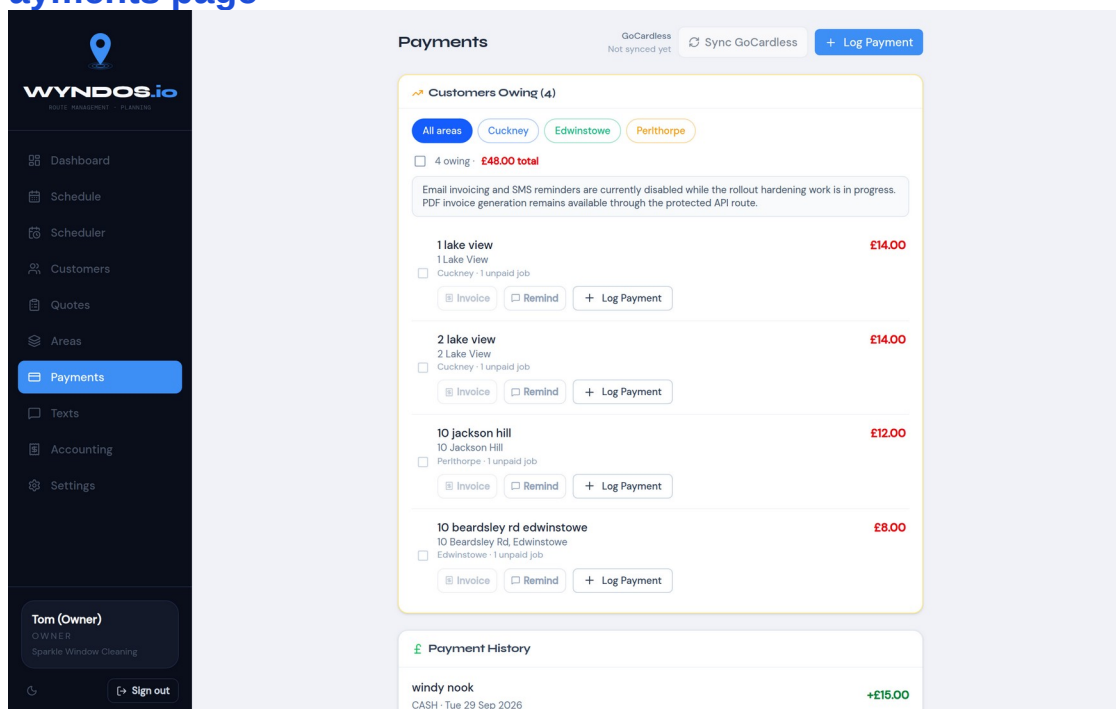

How money is tracked

A customer starts to owe money when a job is marked **Done**. There are several ways to settle it:

- **Done & Paid** on the day, choosing Cash, Card or Bank.
- **Log Payment** on the Payments page or on the customer's page.
- **GoCardless** direct debits, matched automatically by **Sync GoCardless**.

When they pay, the money is set against their oldest unpaid cleans first.

Payments page

Payments page

- **Customers Owing** lists everyone with a balance. The coloured buttons filter it by area.
- Each customer has three buttons:
 - **Log Payment**: record money received.
 - **Invoice**: produce a PDF.
 - **Remind**: send a payment reminder.
- Tick several customers to deal with them together.
- **+ Log Payment** at the top records a payment for anyone.
- **Payment History**, further down, lists every payment received with the method and date.

Tip: The easiest way to chase lots of people at once is **Texts** → **Unpaid cleans**. See [Bulk texts](#). Wyndos can also send payment reminders automatically after a set number of days.

Only people with the **All payments** permission see this page. A worker who takes payment at the door only needs **Their days**.

Accounting

The Accounting page shows your profit for each UK tax year (6 April to 5 April). It needs the **Accounting** permission.

Accounting

Track profit by UK tax year and use quick add for recurring expenses or other income.

Tax year 2026/27 | 04/06/2026 | 04/05/2027 | Apply range | Reset range

Export summary CSV | Export expenses CSV

Viewing tax year 2026/27 with a filtered range of 2026-04-06 to 2027-04-05. Income includes customer payments plus manual and generated recurring other-income entries.

Income	Expenses	Net
£15.00	£0.00	£15.00
Customer payments and other income in 2026/27	Manual and recurring expenditure in the selected tax year	Profit view for the selected tax year

VAT On Income	VAT On Expenses
£0.00	£0.00
Output VAT inside the selected filter range	Input VAT inside the selected filter range

Monthly Breakdown

Month	Income	Expenses	Net
Apr 2026	£0.00	£0.00	£0.00
May 2026	£0.00	£0.00	£0.00

Quick Add

Expense | Other income

Category: Select a category... | Date: 10/27/2026

Supplier: e.g. Screwfix | Amount (£):

Tax / VAT treatment: No VAT registered

Notes:

Accounting page

- **Tax year and date range** (top): choose the tax year, or set your own dates and press **Apply range**.
- **Income, Expenses, Net**: totals for the chosen period. Income includes customer payments, anything you add by hand, and recurring income.
- **VAT on income / VAT on expenses**: shown if you're VAT registered.
- **Monthly breakdown**: income, expenses and net for each month.
- **Quick add**: record an **Expense** or **Other income**. Enter:
 - category
 - date
 - supplier
 - amount
 - VAT treatment
 - notes

Expenses can **repeat** every so many days, weeks or months, for insurance, phone contract, van finance and so on.

- **Export summary CSV / Export expenses CSV:** send the figures to your accountant.

Texts

Wyndos texts customers for you:

- **Day reminders:** “we’re coming tomorrow”.
- **Cleaned, here’s how to pay:** sent when an area is completed.
- **Payment reminders:** chasers for unpaid cleans.
- **Bulk texts:** to any group of customers you choose.

Two ways to send

	From my phone (free)	Automatic (VoodooSMS)
Cost	Free on your phone plan	Pay per text (VoodooSMS credits)
How	Each text opens in your phone’s Messages app, ready to go. You tap Send, come back, and the next one opens	Sent for you in the background
Replies	Come straight to your phone	Go to VoodooSMS
Best for	Small rounds, and when you want replies	Large batches and fully automatic texts

Set the default in **Settings** → **Messaging**. Every send screen also has a **From my phone / Automatic** switch, so you can choose each time.

Test mode. While **Test mode** is on, automatic texts are **not sent**. They’re written to the **Log** so you can check the wording. The yellow banner at the top of the screen reminds you. Turn test mode off in **Settings** → **Messaging** when you’re ready.

Day reminders

On the day screen, tap **Text reminders to this day’s customers**. In the Scheduler, open a day and press **Text reminders**.

Text reminders ✕

Sends from your own phone, one tap each. Free on your phone plan; replies come to you.

Text reminders, bottom

- Who's chosen:** everyone on the day with a mobile number is ticked, and "no mobile" customers are greyed out. Untick anyone you want to leave out, or use **All** or **None**. The grey box above shows a **preview** for the first customer and how many text credits it will use.
- Start sending:** from your phone, or **Send / Test send** for automatic.

Sending from your phone, one by one

When you start sending from your phone, Wyndos works through the list with you:

Phone send queue

1. Progress: which text you're on, and how many have been opened.
2. **Open in Messages**: opens your Messages app with the number and text filled in. Press Send there, then come back to Wyndos. **The next customer opens by itself.** You can still edit the text before opening it.
3. **Skip**: leave this customer out.
4. **Back / Next**: move through the list without sending.

This works on both iPhone and Android. If you stop part-way, the rest wait for you. A green bar shows "N texts waiting to send from your phone" on the day screen and the Texts page. Press **Send now** to pick up where you left off.

Bulk texts and chasing payments

The **Texts** page sends to any group of customers.

PREVIEW FOR 2 LAKE VIEW - 2 SMS CREDITS EACH

Hi there, just a friendly reminder you have an outstanding balance of £14.00 for window cleaning. Please arrange payment at your convenience. Thanks, Sparkle Window Cleaning

Start sending 3 from my phone (1 have no mobile)

Texts page, Send tab

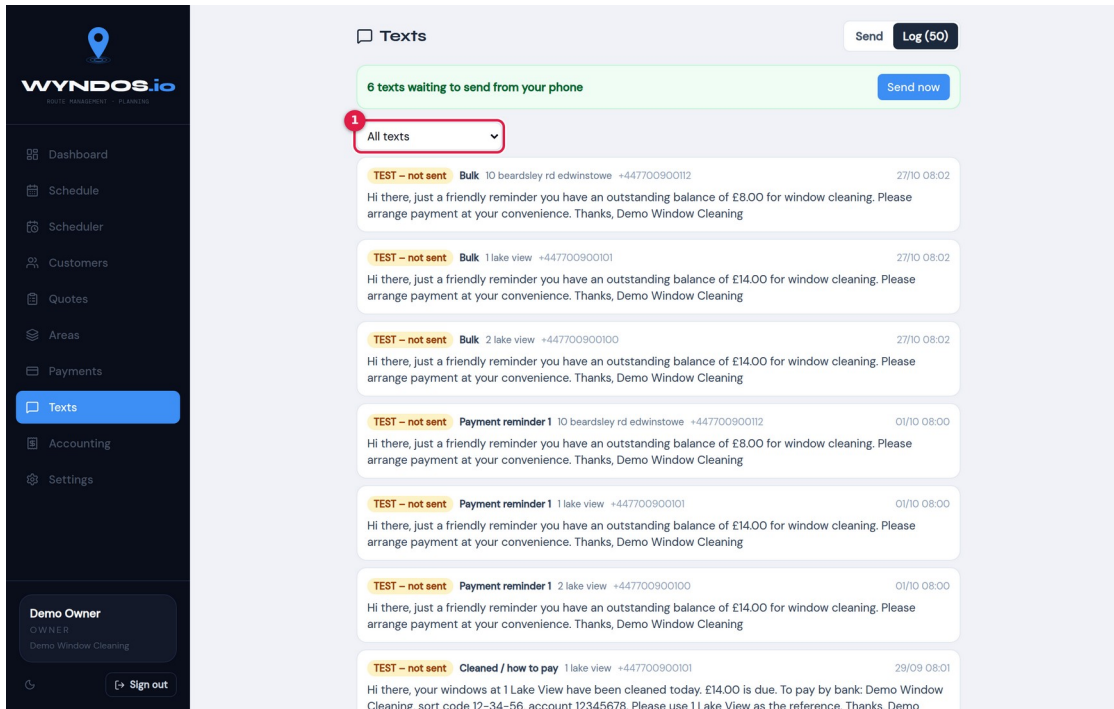

- Who to:** pick a ready-made group:
 - Everyone.**
 - Unpaid cleans:** anyone with completed cleans they haven't paid for.
 - Reminder due:** unpaid customers whose next payment reminder is due.
 - Cleaning soon:** customers with a clean coming up.

Narrow it further by area, tag or search. Each person shows what they owe and which reminder they're on.

- Choose all:** tick everyone in the list. You can also tick people one at a time.
- Start from a template:** for example **Payment reminder 1**.
- Send from:** your phone or automatic.
- Start sending or Send.**

The text log

The **Log** tab lists every text: who it went to, which kind it was, the wording and when.

Text log

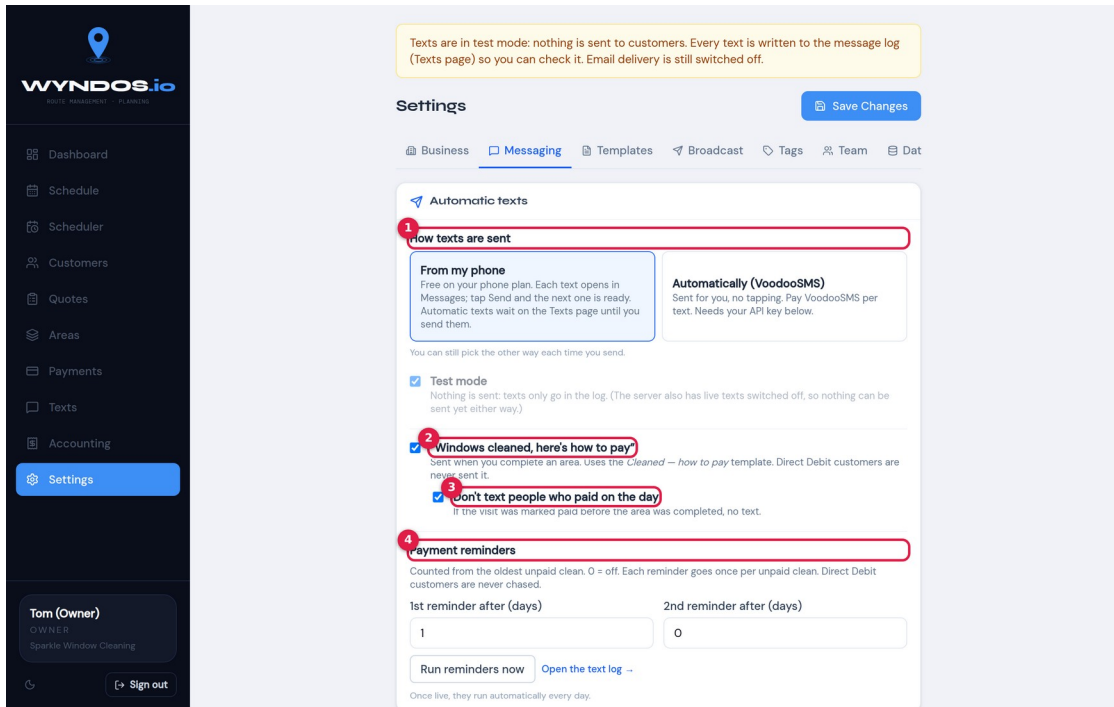

1. Filter the log by kind of text.

Each text shows one of these statuses:

Status	Meaning
TEST – not sent	Written in test mode. Nothing reached the customer
Sent	Delivered by VoodooSMS
Failed	VoodooSMS couldn't send it
Waiting (phone)	In your phone queue, not opened yet
Opened on phone	Opened in your Messages app

Automatic texts

Settings → **Messaging** controls the texts Wyndos sends by itself.

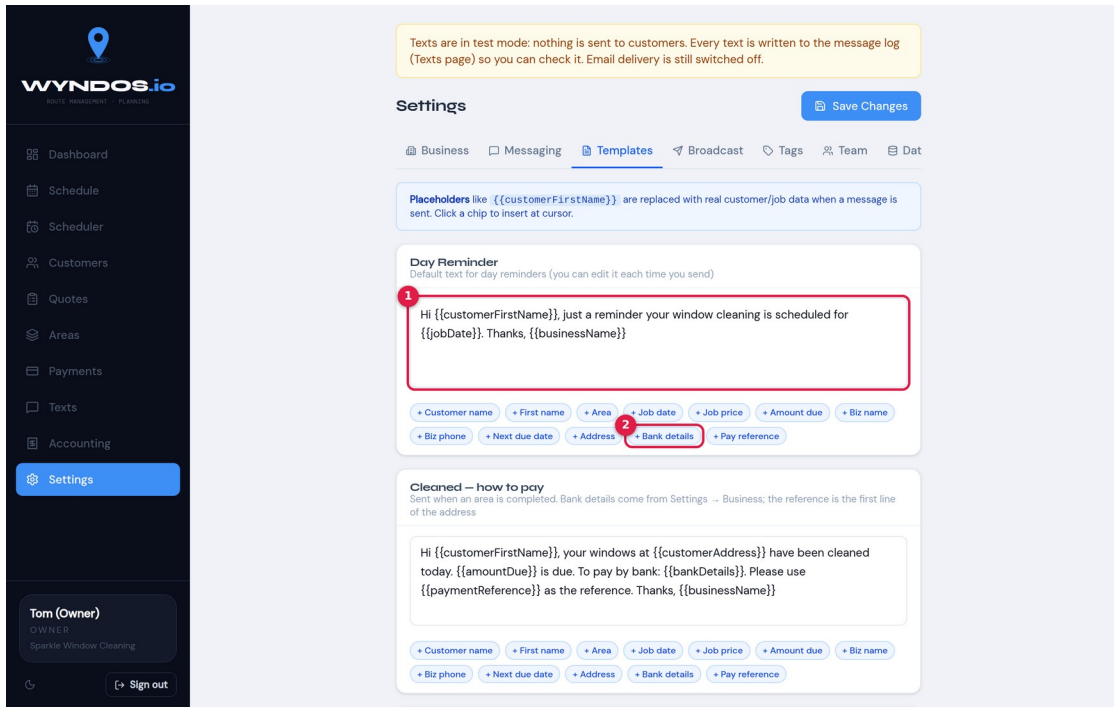

Messaging settings

1. **How texts are sent:** your phone or VoodooSMS, plus the **Test mode** switch. If you use your phone, automatic texts wait on the Texts page until you tap to send them.
2. **Windows cleaned, here's how to pay:** sent to each customer when you complete their area. It includes your bank details and uses the first line of their address as the payment reference. Direct debit customers are never sent it.
3. **Don't text people who paid on the day:** skips anyone marked **Done & Paid**.
4. **Payment reminders:** how many days after an unpaid clean to send the **1st** and **2nd** reminders (0 means off). Each reminder goes once for each unpaid clean. **Run reminders now** sends any that are due straight away. Once switched on, they run automatically every day.

Templates

Settings → **Templates** holds the saved wording for every kind of text: day reminder, cleaned (how to pay), job complete, the three payment reminders, payment received, and so on.

Templates

1. Edit the wording in the box.
2. Tap a placeholder button to insert it at the cursor. **Bank details** is highlighted here.

Remember to press **Save Changes** at the top.

Placeholders

Placeholders are swapped for each customer's details when the text is sent:

Button	Placeholder	Becomes
First name	{{customerFirstName}}	Their first name. If the name looks like an address, it becomes "there"
Full name	{{customerName}}	Their full name
Address	{{customerAddress}}	Their address
Area	{{areaName}}	Their area
Date	{{jobDate}}	The clean's date, for example "Tue 27 Oct"
Price	{{jobPrice}}	The price of the clean
Owes	{{amountDue}}	Their total balance
Next due	{{nextDueDate}}	When they're next due
Bank details	{{bankDetails}}	From Settings → Business

Button	Placeholder	Becomes
Pay reference	{{paymentReference}}	The first line of their address
Business	{{businessName}}	Your business name
Business phone	{{businessPhone}}	Your phone number

A text of up to 160 characters costs 1 credit on VoodooSMS. The preview shows how many credits each text will use.

Printing and sharing the day

Any day can be printed as a run sheet or shared as a PDF, for example over WhatsApp to a worker without the app.

Print or share from the day screen

On the day screen, the two buttons next to **Start day** are:

- **Share** (three connected dots): makes a PDF of the day and opens your phone's **share menu**, so you can send it by WhatsApp, email, Messages and so on. On a computer, the PDF downloads instead.
- **Print** (printer): opens the run sheet ready to print.

The sheet follows whatever you're looking at:

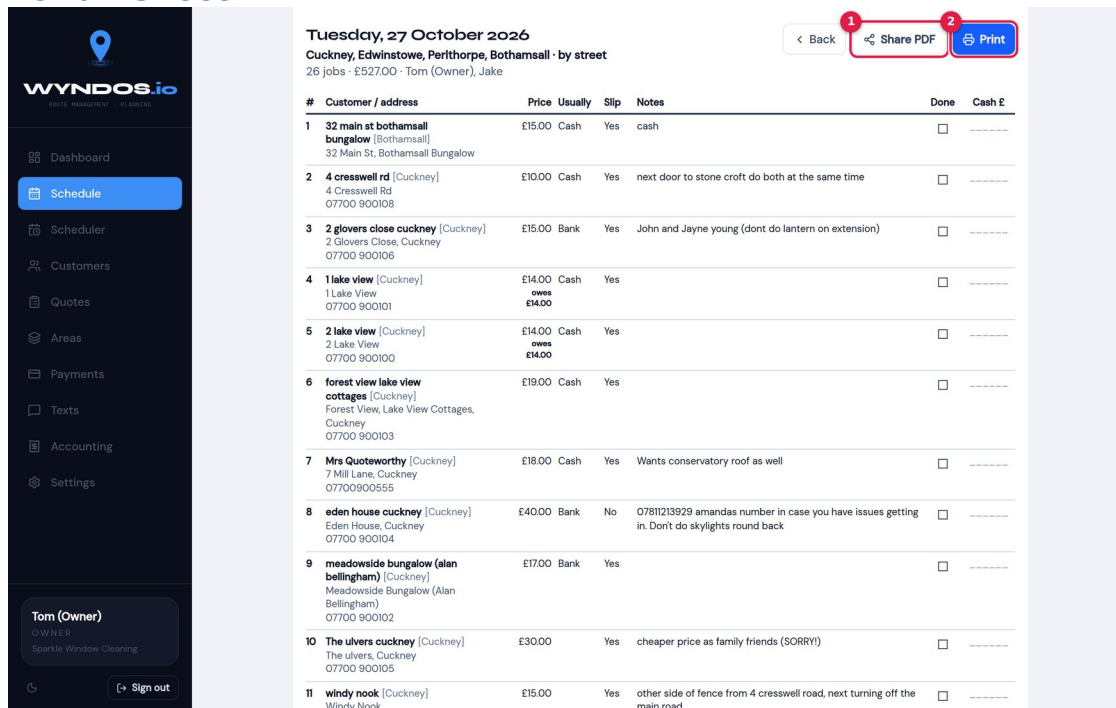

- **By area** or **All jobs by street** order.
- **One area** or the whole day.

Print for one worker

When a day is split between people, choose whose jobs to print. Open an area card, or the day pop-up in the Scheduler, and set **Print / share for**:

- **Everyone**, or
- one person, to get a sheet with only their jobs.

The run sheet

#	Customer / address	Price	Usually	Slip	Notes	Done	Cash £
1	32 main at bothamsall bungalow [Bothamsall] 32 Main St, Bothamsall Bungalow	£15.00	Cash	Yes	cash	☐	...
2	4 cresswell rd [Cuckney] 4 Cresswell Rd 07700 900108	£10.00	Cash	Yes	next door to stone croft do both at the same time	☐	...
3	2 gloves close cuckney [Cuckney] 2 Glovers Close, Cuckney 07700 900106	£15.00	Bank	Yes	John and Jayne young (dont do lantern on extension)	☐	...
4	1 lake view [Cuckney] 1 Lake View 07700 900101	£14.00 OWNS £14.00	Cash	Yes		☐	...
5	2 lake view [Cuckney] 2 Lake View 07700 900100	£14.00 OWNS £14.00	Cash	Yes		☐	...
6	forest view lake view cottages [Cuckney] Forest View, Lake View Cottages, Cuckney 07700 900103	£19.00	Cash	Yes		☐	...
7	Mrs Quoteworthy [Cuckney] 7 Mill Lane, Cuckney 07700900555	£18.00	Cash	Yes	Wants conservatory roof as well	☐	...
8	eden house cuckney [Cuckney] Eden House, Cuckney 07700 900104	£40.00	Bank	No	07811213929 amandas number in case you have issues getting in. Dont do skylights round back	☐	...
9	meadowside bungalow (alan bellingham) [Cuckney] Meadowside Bungalow (Alan Bellingham) 07700 900102	£17.00	Bank	Yes		☐	...
10	The ulvers cuckney [Cuckney] The ulvers, Cuckney 07700 900105	£30.00		Yes	cheaper price as family friends (SORRY!)	☐	...
11	windy nook [Cuckney] Windy Nook	£15.00		Yes	other side of fence from 4 cresswell road, next turning off the main road	☐	...

Run sheet

1. **Share PDF:** the same PDF, shared from this page.
2. **Print:** sends the sheet to your printer.

For each house the sheet lists:

- the customer and address
- phone number
- price, and anything owed
- how they usually pay
- whether to leave a slip
- notes

There are **Done** and **Cash £** columns to fill in by hand. Use **Back** to return to the day.

Prices are left off the sheet for anyone who doesn't have the **See prices** permission.

Settings

Settings is split into tabs along the top. **Business**, **Messaging**, **Templates**, **Broadcast** and **Tags** need the **Settings** permission. **Team** and **Data** are for the **owner only**. Remember to press **Save Changes** after editing.

Business

Your business name, owner name, phone, email, address and logo. The logo is shown on invoices.

Further down are the other business settings:

The screenshot shows the Wyndos.io Settings page, Business tab. The sidebar on the left contains the following links: Dashboard, Schedule, Scheduler, Customers, Quotes, Areas, Payments, Texts, Accounting, and Settings (highlighted). The main content area is divided into several sections:

- Business details:** Fields for Owner / trader name (Demo Owner), Phone (07700 900 123), Email (owner@demo.test), and Business address (123 High Street, Your Town, AB1 2CD).
- Invoice Settings:** Fields for Invoice prefix (INV), Next invoice # (1), VAT number (GB123456789 (optional)), and Bank / payment details (Demo Window Cleaning, sort code 12-34-56, account 12345678). A red box highlights the Bank / payment details field, and a red circle with the number 1 is next to it.
- GoCardless:** A section for integrating GoCardless payments, with a note: "Store one GoCardless access token per Wyndos account, then sync confirmed payments into the Payments page. Matching works best when each customer has a saved GoCardless reference or mandate ID in their customer profile."

Business settings: bank details

1. **Bank / payment details.** These are printed at the bottom of every invoice and put into texts with the **Bank details** placeholder. Write them the way you'd want a customer to read them, for example: "Demo Window Cleaning, sort code 12-34-56, account 12345678".

The rest of this tab:

- **Invoice settings:**
 - **Invoice prefix:** for example "INV" gives INV-0001.
 - **Next invoice number.**
 - **VAT number,** if you have one.
- **GoCardless:** paste your GoCardless access token so direct-debit payments can be matched on the Payments page.

Messaging and Templates

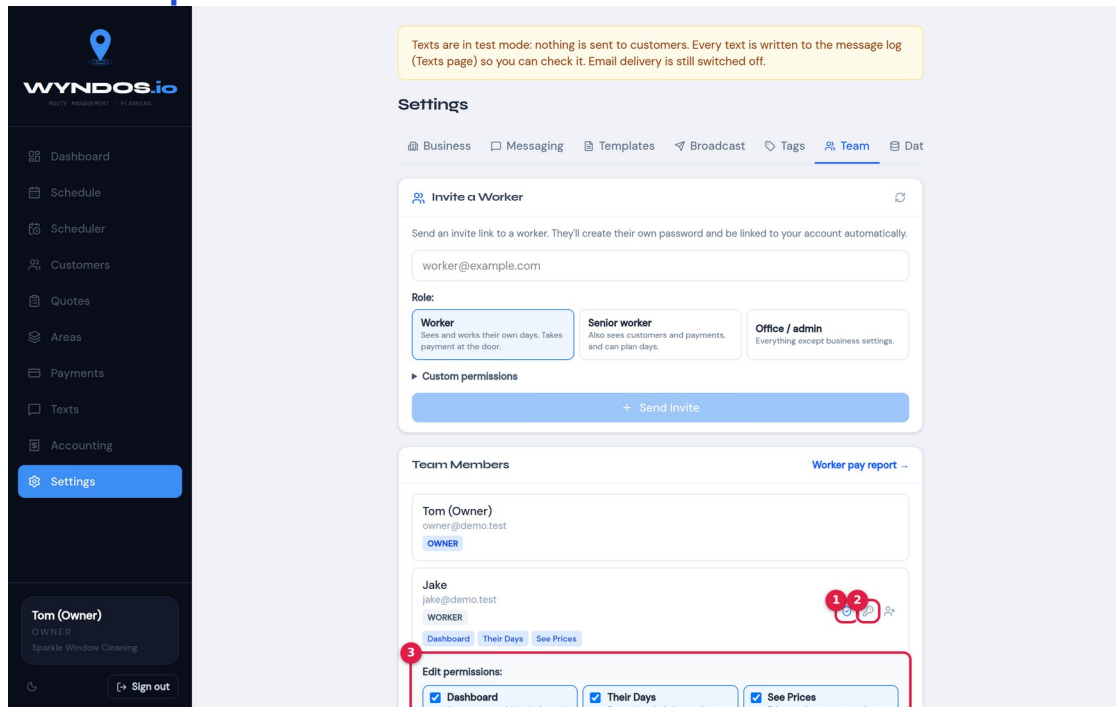

These tabs control how texts are sent, test mode, the automatic texts, and the saved wording. They're explained in full in [Texts](#).

Broadcast takes you to the **Texts** page for bulk messages.

Tags

Create customer tags, such as “Commercial”, “Key holder” or “Gutters”. You can then tag customers on their page and filter by tag when texting.

Team and permissions

Team settings

Invite someone

1. Type their email under **Invite a Worker**.
2. Choose a starting **role**:
 - **Worker**: sees and works their own days, and takes payment at the door.
 - **Senior worker**: also sees customers and payments, and can plan days.
 - **Office / admin**: everything except business settings.
3. Open **Custom permissions** to fine-tune the role, then press **Send invite**.

They get a link, create their own password, and join your business.

Team members

Each person is listed with their role and permission tags. The numbered boxes in the picture:

1. **Edit permissions** (pencil icon): change what this person can do.
2. **Reset password** (key icon): set a new password for someone who's locked out. Type one, or leave it blank and Wyndos makes one up. Give it to them; they can change it later in **Settings** → **Security**.
3. **The permission switches**: tick or untick each one. Changes apply straight away.

Worker pay report shows each person's completed work for paying them.

What each permission allows

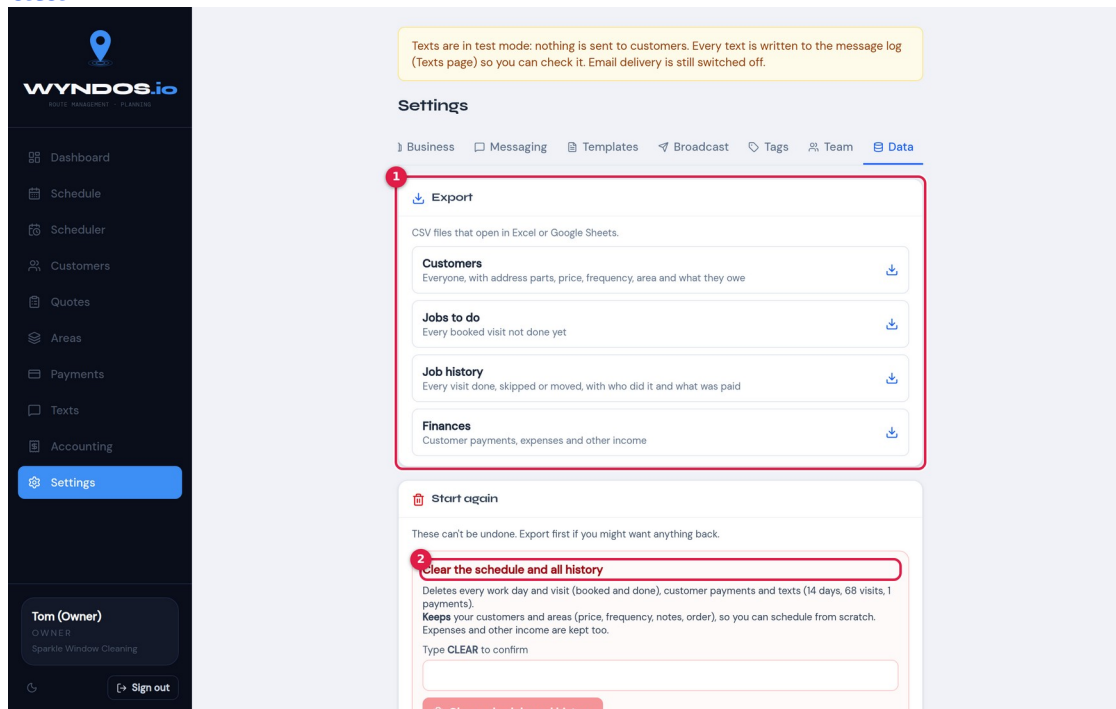

Permission	Lets them...
Dashboard	See the home screen with today's work
Their days	See and work the days or jobs given to them, take payment at the door, book quotes and one-off jobs on their own day
See prices	See prices and amounts owed on their jobs. Without it, prices are hidden, even on printouts
Customers	View, add and edit customers; see Quotes
All payments	See every customer payment, log or edit any payment, send invoices
Texts	Send day reminders and bulk texts
Plan the diary	Use the Scheduler: book, move and give out days
Areas	Create and change areas and their frequency
Accounting	See expenses, other income and business finances
Settings	Change business settings (not Team or Data)

The owner always has everything. Giving someone **Their days** lets them take payment for their own jobs. It does **not** open the Payments or Accounting pages; those need **All payments** and **Accounting**.

Security (your own password)

Settings → **Security** lets anyone change their own password: enter the current password, then the new one.

Data

Data settings

1. **Export:** downloads CSV files that open in Excel or Google Sheets:
 - **Customers:** everyone, with address parts, price, frequency, area and balance. This file can be imported straight back in.
 - **Jobs to do:** every booked visit not yet done.
 - **Job history:** every visit done, skipped or moved, with who did it and what was paid.
 - **Finances:** customer payments, expenses and other income.
2. **Clear the schedule and all history:** deletes every booked day and visit, every payment and every text log. **Keeps** your customers and areas (price, frequency, notes, order), so you can schedule from scratch. Expenses and other income are also kept. Type **CLEAR** to confirm.
3. **Clear everything:** deletes customers, areas, the schedule, history, payments, expenses, tags, holidays and texts. **Keeps** your business details, settings, templates and team. Type **DELETE EVERYTHING** to confirm.

Warning: Neither clear can be undone. Export first.

Worker guide

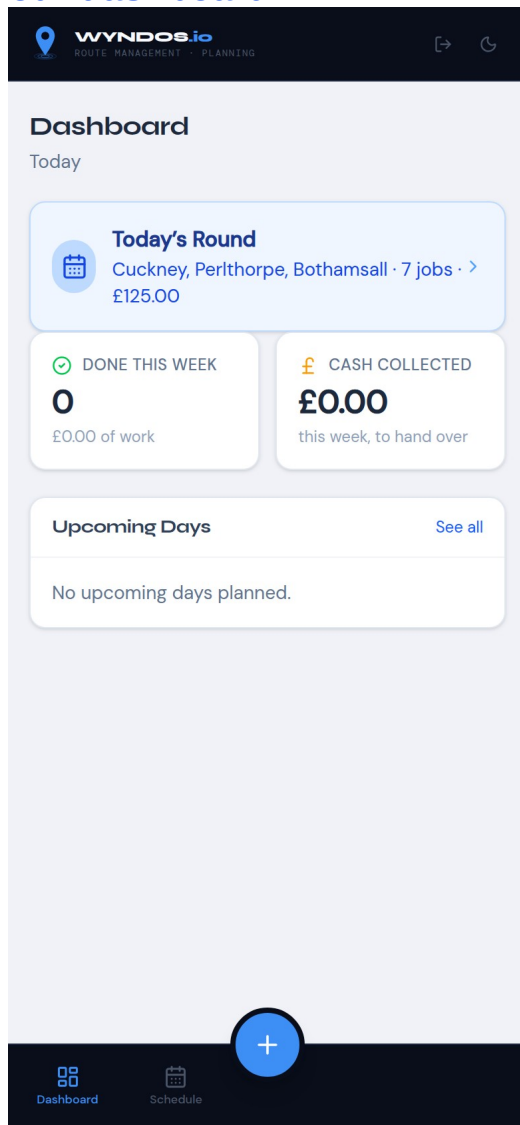

This chapter is for people working the round. You'll mostly use Wyndos on your phone. What you can see depends on what the owner has switched on for you, so your screens may have a few more or fewer buttons than these.

Getting started

1. The owner sends you an **invite link** by email. Open it and choose your own password.
2. Go to **wyndos.io** and sign in with your email and that password.
3. Add Wyndos to your home screen so it opens like an app and works with no signal:
 - **iPhone (Safari):** tap **Share**, then **Add to Home Screen**.
 - **Android (Chrome):** tap **⋮**, then **Install app**.

Forgotten your password? Tap **Forgot password?** on the sign-in screen, or ask the owner to reset it for you.

Your dashboard

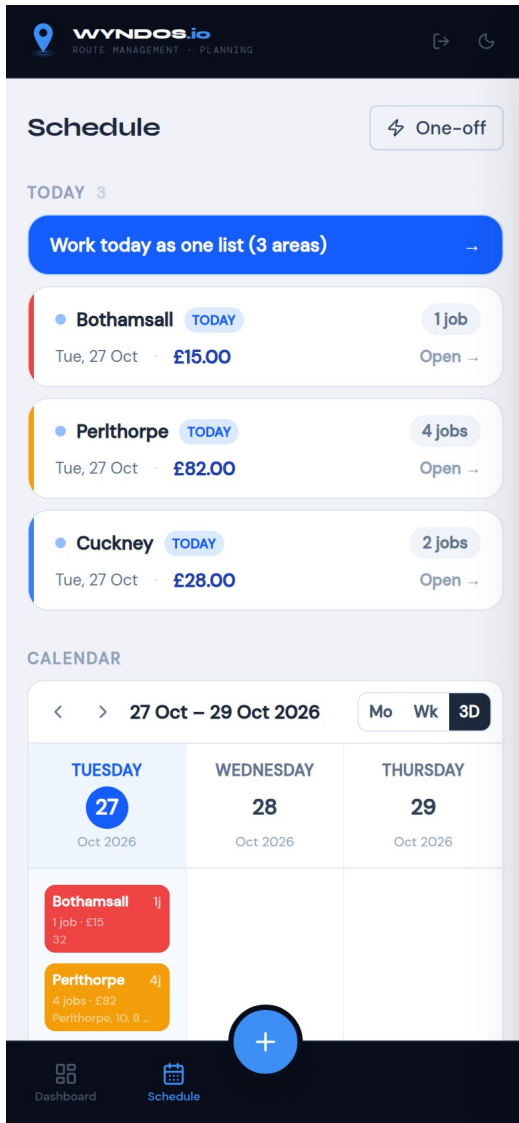

Worker dashboard

- **Today's Round:** your areas today, with the number of jobs. Tap it to start.
- **Done this week:** how many jobs you've finished.
- **Cash collected:** cash taken this week, which you hand over to the owner.
- **Upcoming days:** your next days.

Your days

Tap **Schedule** on the bottom bar.

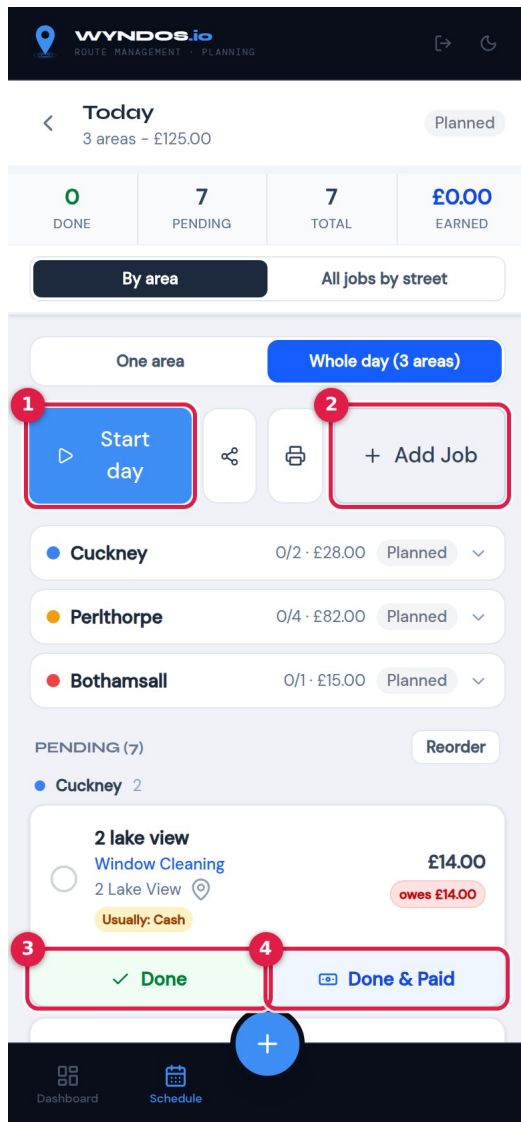

Worker schedule

Today's areas are at the top. Tap **Work today as one list** to see all your jobs together. The calendar underneath shows your upcoming days (switch between **Month**, **Week** and **3Day**).

Working through your jobs

You only see the jobs given to you.

Worker day

1. **Start day**: tap when you begin.
2. **Add Job**: add a one-off job to your day.
3. **Done**: tap when a house is cleaned and they'll pay later.
4. **Done & Paid**: tap when they paid you there and then. Choose **Cash**, **Card** or **Bank**.

More things you can do:

- **By area / All jobs by street**: switch between keeping areas together and one list sorted by street.
- **Tap a customer's name** to:
 - change today's price, for example fronts only
 - add a note, such as "gate locked"
 - ring them

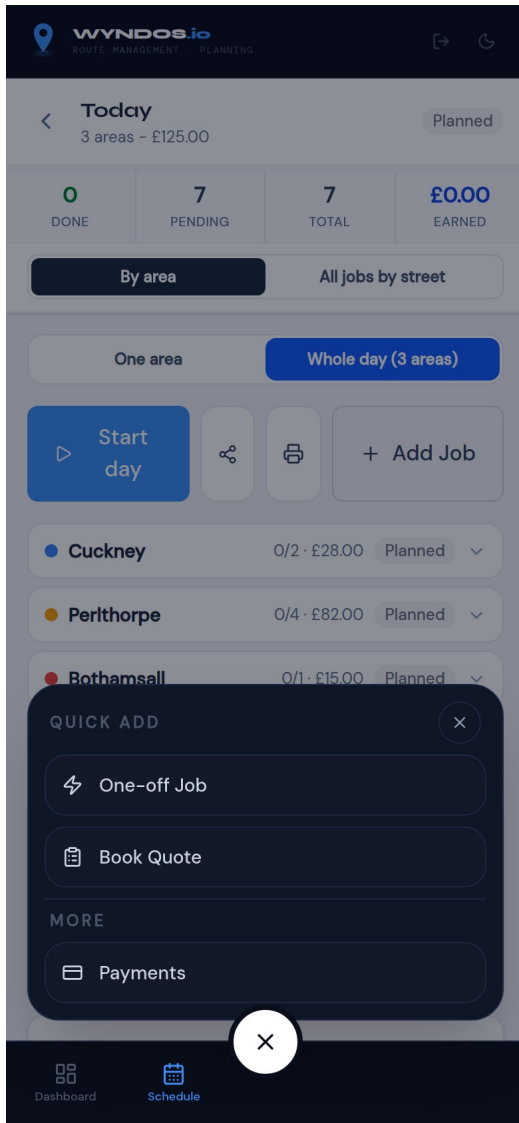

- **Skip** them if you couldn't clean
- **Map pin:** opens the address in Google Maps.
- **Tags:**
 - **Usually: Cash:** how they normally pay.
 - **Owes £...:** they have money outstanding. If they pay it, leave the “Also pay the ... owed” box ticked when you choose Done & Paid.
- **Notes** on the card, such as “watch overhead cables”, come from the office. Read them before you start.
- **Tapped the wrong one?** Tap the job again and use **Undo**.

When you've finished, tap **Complete Day**. Anything you didn't get to is carried over, and the office can see it.

No signal? Keep going. Your taps are saved on the phone and sent when the signal comes back. Don't close the app until they've gone through.

Quick add

Tap the round + button at the bottom.

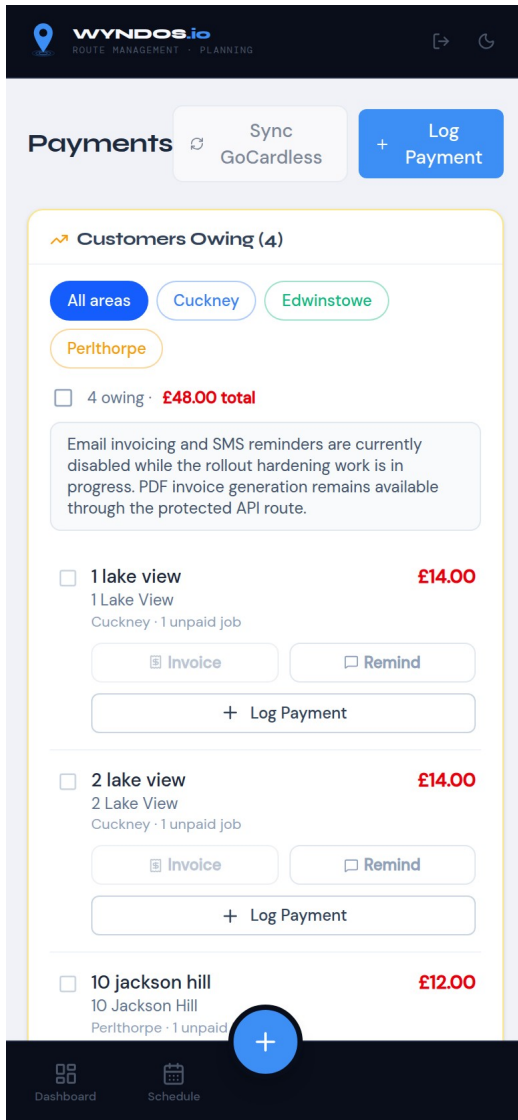

Worker quick add

- **One-off Job:** book an extra clean, for someone new or existing, onto your day.
- **Book Quote:** someone asked for a price. Book a quote visit with their name, address and phone. See [Quotes](#) for how to mark it quoted, won or lost.
- **Payments:** if you have the All payments permission.

Payments (if switched on)

Some workers can also see the **Payments** page, to log money received for any customer.

Worker payments

Printing your sheet

The printer button on the day screen prints your jobs only. The share button sends them as a PDF. See [Printing and sharing](#).

Worker FAQ

I can't see a customer or a page the owner mentioned. Your permissions don't include it. Ask the owner to switch it on in Settings → Team.

Prices don't show. The owner hasn't given you **See prices**. You can still tick jobs off.

My day is empty. Jobs may be assigned to someone else. Check with the office, or look at the **Show jobs for** list.

FAQ and troubleshooting

Schedule and areas

How do I change how often a customer is cleaned? Frequency belongs to the area. Either change the area's frequency, which changes everyone in it, or move the customer to an area with the frequency you want, for example "Cuckney (8 weekly)". Create that area first if it doesn't exist.

An area wasn't booked after I completed it. The next visit is booked when the area is **completed**. Check the day was completed, and not just had every job ticked. Look in the Scheduler under **Areas overdue**.

I clicked a day on the Scheduler and want the full list. Press **View full day** in the pop-up.

How do I move one customer to a different day this time only? Skip them on the day (they move to their next normal visit), or book a **One-off Job** for them on the day you want.

On the round

I ticked the wrong job. Tap the job again and press **Undo**.

No signal. Carry on. Taps are saved on the phone and sent when you're back online. If something couldn't be saved, you'll see a warning.

The price was different today. Tap the customer's name and change the **Price** before marking the job done. This changes today's visit only. To change their regular price, edit the customer.

The list order is wrong. In **By area** view, use **Reorder** and drag the jobs. For a street-by-street order, switch to **All jobs by street**. It relies on tidy addresses, so check **Customers** → **Tidy addresses**.

Texts

Nobody received my texts. Check the yellow banner. If **Test mode** is on, texts only go to the log. Turn it off in **Settings** → **Messaging**. Also check that the customer's number is a UK mobile; landlines are marked "no mobile".

Sending from my phone stopped after one text. After pressing Send in Messages, come back to Wyndos (swipe back or switch apps). The next customer opens by itself. If you left part-way, the green "**texts waiting**" bar lets you carry on.

Where do replies go? With **From my phone**, replies come to your own phone. With VoodooSMS, they go to your VoodooSMS account.

How much do texts cost? Texts from your phone cost nothing extra on most plans. On VoodooSMS, each text of up to 160 characters uses 1 credit. Longer texts use more, and the preview shows how many.

Team

A worker can see Accounting or Payments and shouldn't. Open **Settings** → **Team**, press the pencil icon next to them, and untick **All payments** and **Accounting**. **Their days** alone still lets them take payment at the door.

A worker is locked out. Press the key icon next to them in **Settings** → **Team** to set a new password.

A worker can't book a quote. They need the **Their days** permission. The quote goes on their own day.

Data

Can I get my data out? Yes. Go to **Settings** → **Data** → **Export**. The customers file can be imported back in at any time.

I want to start again with the same customers. Go to **Settings** → **Data** → **Clear the schedule and all history**. Export first.
